## From Reader Review Carnal Instinct for online ebook

Another great installment to the Ghost Cats series. In this book Fiona LaSalle has been dumped by her boyfriend after he stole all her money so she goes to work at a wildlife preserve to get out of debt. While there she meets a lion named King who happens to be a shape shifter. King, otherwise known as Cade when he's human, knows that Fiona is his mate, he just has to make her see that.

This book had some great sex scenes and good character development. This installment was a little longer and than the first and I still wanted more. I enjoyed the interaction with the characters from the first book and meeting some new characters in this one. I would have like more in the way of conversation and less inner monologue.

Overall I really enjoyed this book and would like to read more in this series.

Hidden hunks at the Zoo, March 8, 2014

This review is from: Carnal Instinct: A Ghost Cats Story (A Ghost Cat Book) (Kindle Edition)  
I am a big fan of Michelle Pillow and the Ghost Cat Series is a fun, hot paranormal series. This story has an interesting take on the feline shifters and it was interesting to find them hanging out in a wildlife preserve taking it easy. Some were there as rescue animals with the owner unaware many are shifters.  
I love the way the heroine, Fiona, has been confiding in one particular lion and how they interact at the zoo. When King transforms into his human form and goes after his mate some hot erotic, romantic sparks fly. Yes this story can get a bit strange and the ending I bit twisted but that is the idea of paranormal fictional erotic romances, anything goes. That is what makes this story a great fun romantic hot read. I think I will always look at those big cats at the zoo a little different, lol

Hated it! The plot was stupid, the characters were extremely annoying and the language was horrendous. I've read several things by this author and cannot understand what happened with this story. Just terrible.

Damn those green eyes of hers!

This story had great potential. You have a quirky heroine, Fiona LaSalle, who is forced to work in a Wild Life Rescue and Preserve because she has been monetarily cut off by her father. She is penniless because her boyfriend cleaned her out. You listen to her venting about her bad luck with a lion she has named "King". Fiona shares her secrets and fantasies with King unaware to her that he is a real person. Throughout her diatribe you witness the lion reacting to her by either snorting or roaring at something she said that he did not like. Like when she tells King she is going out and getting laid with the first man she comes across. King goes ballistic and almost get Fiona fired.

This is where the train stops and I get off. King turns into Cade, follows Fiona to a restaurant, walks in stares at her, and.... She leaves with him to a no man's land forest and have HOT SEX!! No question asked--not even his name....What?!! I think of myself as an open and flexible reader, however, this was a stretch. The author does not give the reader anything to understand why Fiona would just leave with a complete stranger other than internal dialogue: "This is meant to be. Go with him. Be with him", and pheromones. I was able to recover from this mishap in the story because Fiona is Cade's destined mate and it was interesting to watch Cade try to court Fiona in human form. There is also an unexpected twist at the end of the story but it is lost because the plot was not smooth. A lot was left to be desired..as I stated earlier...this story had so much potential.
