## **Forget Me Not** Shannon K. Butcher

The last thing Adria expects to find when she arrives at her vacation rental is a man in her front yard—unconscious and stark naked. But something else sets him apart from most strangers. He is no ordinary man. Toren is new to Earth, framed for a crime he didn't commit and banished to this planet to serve his sentence. He's desperate to return to his planet, because the magic that is part of him will soon disappear, and along with it, all of his memories. Adria is his only hope to help make his escape for home—and as fate would have it, his reason to stay.

This is not part of the Sentinel War series so be warned. This is a love story that was way too sappy for my taste. Found myself rolling my eyes on more than one occasion. Also be warned that it is very short.

I like Ms. Butchers paranormal series and this short story, but I am starting to think that \$2.99 is too much for stories not even 92 pages long. Especially since the actual story was only 73. The rest of the 91 pages were chapters from the next two books in both of her series.. I don't think I will be so quick to pay the price again. It is a pity I have already bought the other one.. Oh well, lesson learned the hard way.

For an alien short story I really liked this stand alone tale. It had a happy ending which I enjoyed.

This was a short, sweet ebook about alien Toren who is thrown out of his own evil world onto our own. The problem is, the minute that he lands on earth he starts to forget his own. He also starts to lose his powers. Adria has finally forced herself to take a vacation from her demanding job. Of course finding a big crater in front of the cabin wasn't quite on her agenda. The huge light blue alien with the purple eyes and sentient hair at the bottom of the pit wasn't quite what she had in mind for a hookup. But hey what happens on Obliterra(Earth) stays on Obliterra. Toren has to get back to his own world or the death of his sister at the hands of a mad man...err..alien will go unavenged and his family is at risk. The longer he stays on earth, the more he forgets. He just didn't count on a Adria;s pair of brown eyes making him long to forget everything except how to please her. This was a sweet, sexy quick read and had an even sweeter ending that I wished could have been drawn out more.

Interesting new world and a hot romance. My only complaint (and I say this about almost every novella I

read, so take it with a grain of salt) is that it felt too short.

The idea that the hero needed to get home to his world in order to bring justice to his sister's killer, but would forget more and more of his life there and his purpose the longer he remained on Earth was an interesting premise but the execution...

I really like Butcher's Sentinel War series, but this standalone alien romance just didn't click with me for some reason - I guess I just never fell for the leading man. I think that if there had been a better reason for the hero to make it home before his powers and his memory faded - one with more pathos - I might have liked it better. As it was, the hero just wasn't conflicted enough between his responsibility and his sudden feelings for the heroine to win me over. The heroine on the other hand does manage to stir some sympathy, she's loved and lost and is destined to lose again and I respected her willingness to accept that loss to do the right thing.

When all is said and done though, it is likely the real problem was the length of the story, this was fairly short and in order to fit a fair bit of steamy stuff in - and with short span of time that the pair were together - there just wasn't time to develop the emotional part of the connection between them.

This novella was not up to Shannon Butcher's usual standards, at least not in terms of her longer fiction, and it has almost convinced me to just stick with her regular fiction.

The premise is that Earth is a magic-free prison for an alien race. The longer the prisoners are here, the less they remember/resemble their own species. Toren witnessed the death of his sister by her husband, and that husband opened a portal, sending him to earth before he could do anything about it.

He arrives, Superman or Terminator style, in the front yard of Adria's rental cabin. There is instant, mutual lust.

It was predictable and uninspired. I can't even put a finger on why that was, maybe because it was so formulaic and yet so short. There wasn't a chance to really bond with the characters to feel what they felt for each other before they are jumping into bed together and declaring their tragic love for each other.

I like Butcher's Edge series and her Sentinels. I like her strong female characters that have opinions and disagreements with the alpha males. This heroine was neither strong nor opinionated. The plot was too simple, the solution even simpler.

It didn't click if that makes sense there's more that could of happened

The entire premise is preposterous of course; an alien cast from his planet and landing on Earth, naked in a crater his fall created. But the part I found really ridiculous was that Adria felled into bed with a blue-skinned creature from another planet within hours of meeting him, lol! I mean c'mon, wouldn't a normal person run screaming at the very idea of aliens? And perhaps check themselves into a mental hospital? Nope Adria and her blue man promptly fall in love, and she sets out to help him find his way back home. Because she loves him too much to keep him here while he loses any memory of his home planet, his family, and the killer of his sister, who **MUST NOT** get away.

So all in all, it was not a bad story and I read to the end so I could see how they would achieve their HEA. And of course, they do....

Very cute sci-fi short story about an alien banished to earth as punishment for a crime he didn't commit and his struggle to get back home. My only complaint is that the ending seemed very rushed. This was my first read from Shannon K. Butcher but I'll definitely be picking up some of her other books.

### **Darcy says**

I thought the concept of this one was interesting, but very predictable. I liked how Adria did her best to help Toren remember and was willing to give him up so that he could go home.

3.4 Stars!!!

Why do I keep reading novellas? They are just great but underdone stories.

I love this author and the Sentinel Wars Series is one of my favorites but this just needed to be a little bit longer. Having said that. The characters are great, the story interesting full of so much promise. Tell me, is this some new world that the author is stepping into? Aliens from other worlds?

What is amazing that in this short 91 page book that the author presents such multi-layered characters who really jump off the page. It just happens way too fast and is missing some meat on the bones. Maybe it is just me and I am missing my Theronai men??? :-)

A good read, albeit short.
