James says

Downloaded the book series and started listening to it. The first couple of books were interesting as I had no idea where the whole series was trying to go. The story took several books to unfold and eventually you had curious to see how it would play out. Writing was decent for a sci fi novel. However, somewhere around book 8 and the capture, it really started to slow and disengage me from the story line. Didn't care for where Monty picked up the storyline. Then by book 10 and 20 days of driving, my goal became to wrap it up and get onto something else.

On a side note, i did learn that L Ron Hubbard just didn't write Dianetics, but he also wrote several sci fi novels. I may check out another one, but am not rushing to get them.

Jacob Wegleitner says

SAVE EVERYTHING!

Forever Young Adult says
