Ciara Cole

**Maid's Black Babies for the Billionaire (BWWM Romance)** Ciara Cole

The moment I saw her – that pout, those curves, the tenacity – my c@\*k was called to attention.

I just had to know her.

I offered Vivian the job of a lifetime: the personal maid of a billionaire. And with one hell of a salary. I knew she wouldn't turn me down. She needed the money. And, like me, she knew the value of a dollar.

But what I didn't take into consideration was my heart... My cold, ruthless soul melted in her palms.

When she got pregnant, it was a shockwave. But now I need to change for her.

Can Vivian save me?

**Note:** *Maid's Black Babies for the Billionaire* is 45k of hot, steamy romance between a cocky alpha billionaire and his sexy older maid. Features one bonus BWWM romance novella, *The Baller's Baby Daughter*!

**Hated it!**

This book.....First the beginning was just horrible having to read about this 45 year old woman who just acted desperate and her crying over her boss who hadn't even touched her UGHHH. Second just when you think your in the middle of the book it abruptly ends and a whole new book that you could care less about begins. Needless to say this book goes into my least favorite pile of reads.

**Maids Black Babies for Billionaire**

This was a wonderful story that I couldn't put down! Vivian. I liked her so much. I loved her sass, her personality. She was real. Plus she was 45, an older woman. I like stories with older characters, as I'm 55. When I started this, I thought she was going to buck heads with Fred. What a dick! Omg What a loser! I'm glad he was away for most of story. I loved Rafe. Period. Alpha male extraordinaire. When he was introduced I knew he was a goner when he first met her. You could tell by his reaction. That man fell in love with her at first sight, but it took his head a while to realize it, but once he did he did. I loved their banter and the passion that exploded was off the charts. She was so perfect for him. Quite a stud at age 35 lol. I was giddy with joy reading the epilogue. Their children will have the best life, and I hope she and he try for another baby. I hope they never run into Fredrick or Avery that bitch. Boy she sure showed her true colours. I knew she had a thing for Rafe, and pretended to be nice to Viv. Her and Fredrick deserve each other. I'm also glad Clarke Vivian's brother finally grew to love and accept Rafe. I think he realizes Rafe would do anything and everything for her. He'd protect her with his life. That man adores her and made him into the wonderful husband and father he was always meant to be. Bravo on a great story!

#### **Love at first sight**

True love of love at 1st sight. And all they had to go through to prove their love to others

### **Juanita says**

#### **To complex for simple story**

I lost interest bout 20% of the book being I was so lost who was going to be her love interest. The uselessness of the extended introduction of character who played minimal role took away from the story.

#### **Good read**

Although the titles make me cringe and sometime just giggle the books are always a good read. This one was no exception. Two books in one and good little stories. I truly can't say I ever read a book by this author I didn't enjoy.

#### **Questions**

How do you know when you find someone that you should look at twice? What is it that determines when you should take a small risk let alone risk your all? This is a hot read that let's you enjoy Vivian & Race as they answer these questions for themselves.

#### **Finding Love**

An interesting story about two people who happen to meet and ended up being employer and employees and also falling in love even though the employee was older, it did not matter their love blossom.
