March Of The Ankylosaurus Rex Stone

Tom and Jamie can't believe their luck when they find a secret entrance to a prehistoric world filled with dinosaurs!

It's time for some dino-tracking! A small set of dinosaur footprints leads Tom and Jamie straight to a baby ankylosaurus trapped in a pool of slimy muck. They must help it get out of the muddy marsh but how?

Nele Handwerker says

Schöne Idee für Kinder den Einstieg in Echtzeit zu den Dinosauriern zu ermöglichen.

Squirrely G says

Read this with my son, taking turns - good book for beginning readers, and the dinosaurs helped keep him interested.

Clarissa says

An entertaining read that any dino-lover kid can enjoy! It works perfectly for early readers, and the illustrations make the read more engaging for the little ones. I recommend it if you are looking to spark interest for dinosaurs in a kid, and this book works fine as an introduction to the Dinosaur Cove series.

Alysha DeShaé says

Adorable and simplistic without being too childish for younger readers.

Emily says

Another good read in the series.

Puja Shah says

Tasmay read the book....found it very funny, in the book there was an Ankylosaurus that got stuck in the mud and the 2 kids Jamie & Tom rescued it in a very interesting way.

Lindsay says

Bryant really likes this series...we've been taking turns reading the pages together.

Leeloo says

My Dino loving 4 year old loves Dinosaur cove chapter books. An easy read, lots of dinosaurs to learn about, each book focuses on one type. This book has been my sons favorite in the series thus far. Little readers will learn more about paleontology and various dinosaurs while following the exploits of Tom and Jaime. Along the lines of Magic Tree house, but with more adventure and a bit more focused as each book is on dinosaurs.

Reagan says

When the boys go to dinosaur world again, they find an baby ankylosaurus trapped in mud. They try to get it out. How will Tom and Jamie save the baby ankylosaurus?

I really like this book. I like ankylosaurus's a lot. I think having a clubbed tail would be cool. You should read this book.

Brendan says

Read in one day.

Kathy says

My son found this in a used bookstore clearance section. He isn't reading on his own yet, but likes longer stories at bedtime and is totally into dinosaurs at the moment.

This story is long enough to be read over several nights but the not so long that he loses interest over time and has a pretty reasonable amount of illustrations for an early chapter book.

Story is pretty formulaic, boys go to cave, meet new dino, have adventure and go back home. The intended audience isn't going to care...it's dinosaurs. Who doesn't want to see living dinosaurs? The idea went over well, because my son saw the covers for the other books in the series on the back and stated we needed to read those stories too.
