Who knew you could build so many things using duct tape?? These are a lot more involved than a duct tape wallet and will certainly take a lot more time to complete. Sounds like the perfect book to give a tween/teen before summer vacation. Heck, they can spend the first half of summer creating the duct tape kayak, and the second half tooling around in it!! :) I'm so glad I won this book giveaway!

Slick and fun, this book does far more than demonstrating how to assemble "from backpacks to kayaks, writing desks to rocket launchers" out of duct tape, cardboard, and PVC pipes. For all ages, it merges the problem-solving mindset essential to both artists and engineers.

Interesting How-To picture book explaining various projects involving the aforesaidmentioned duct tape. Not exactly what I was looking for but informative for those who are embarking on any projects he explained in detail.
