This was an amazing book. He incorporated the "interactive" part very well. Although it is not one of his best books it is still good.

"Zombies Attack!" is the first book in a new series in the world of Minecraft. Mark Cheverton has created an interactive downloadable map enabling players to travel with the Minecraft characters into the Far Lands on the edge of its outer borders. Players will be immersed in the adventure as they battle three-headed monsters, destroy zombies, slay huge spiders, stomp skeletons and search for treasure while exploring the dark forests of the Far Lands. Detailed directions for downloading the game are included at the beginning of the book.

"The sorrowful wails of the zombies filled the air. Watcher couldn't tell how many there were, but from the smell coming from the disgusting creatures, it seemed like a lot."

Nearly all of the inhabitants of Watcher's village were either slain or taken prisoner by the attacking horde of zombies that quickly stormed over the village, including his father and sister. So begins the adventure. The zombies continue to systematically assault the surrounding villages, while searching for gold and healthy slaves. With fellow survivors Blaster, Planter and Cutter, they trail behind the zombies and their captives trying to formulate a rescue plan.

I thoroughly enjoyed this adventure book and highly recommend it for preteens, teenagers and adults.

It was as good if not better than the best Gameknight999. With Gameknight, he was always doing the exact same, monotonous thing: grieving Herobrine. Now it's a different character in a different land, with different friends, with a different personality, doing something different. Can't wait for the next one.
