## **S.E. Nelson says**

Christine starts a dating service called "Merry Matchmakers," and unknowingly uses Derek's photo to advertize the business. Derek learns about this and is not amused. The confrontation and negotiations between the two lead to chemistry and the rest is history. Though the story is predictable, it was a lot of fun to read and the realistic romance between two mature adults elevated the story for me. I also enjoyed the supporting characters of grandmas. If you love romance, you will enjoy this story.

## **Jenn says**

Oh god. I got this forever ago free for the Kindle. So, it was gym reading. I loathed it. I hated the two main characters. Derek was slightly better than Christine, but her flip flopping around about what she wanted drove me nuts. And the bit about the mom added nothing at all to the story and could have been told with some short phone convos with her rather than giving her her own POV. Blech.

## **Michelle says**

Too many side tangents that added nothing to the story. The character Christine made me want to smack her for her indecisiveness. Most of the women characterized in this story act ridiculous and I find their actions insulting as a woman.

## **Taylor says**

not my favorite book. started slow. I was also not a fan of having so many couples in one book. too many people to keep up with.

## **Poonam says**

An okay romance story. Sweet ending .

## **Christine says**

A cute book about a middle of life woman finding herself while starting a dating service in Florida.
