Keith says

Fun but predictable.

Meh

I only read "The Face of Fear ", not the trilogy.

I read to page 220, but when the explanation and description about climbing equipment arose, I started skimming the rest of the novel, because it was quite predictable.

I have read several books by this author, but this is not one that I enjoyed. I bought this novel but ended up keeping it for quite a while before I read the book.

I doubt that I will be reading the other 2 books in this trilogy.

Mike says

Loved the earlier Koontz, especially "Face" which was made into a movie with Lee Horsley and Pam Dawber, which wasn't too bad. Good twists.

Linda says

All good stories!!

Brandon Mclaughlin says

I read the face of fear and it was a alright thriller, koontz has wrote better in my opinion. The thrill At the ending was kind of exciting. Again it was a pretty vaguer story at parts, but it is a good read for the constant reader. 3/5
