Kate Raven says

sadly i lost this book to lending, but it's so good. i haven't seen it available outside of costa rica though

Sofia Mora says

Yo me leí este libro porque era de mi mama y un día me lo encontré entre unos papeles. Se nos muestra la destrucción de la naturaleza en Gandoca y como una mujer intenta hacer algo al respecto. El libro critica la manera en la que los intereses de algunos pocos se sobreponen a algunas normas ya establecidas para la protección de ciertas áreas y lo difícil que es intentar detener estas acciones si no se tiene mucho apoyo.

Jacqueline says

It's a great story about a woman and her love for nature and for her husband, and the struggles she encounters with each. I really liked it

Megan Megaard says

Me encantaron los temas de este libro. Me educó de los problemas ambientales de Costa Rica y me enseñó mucho español costarricense.

Brianna says

One of the worst books I've ever read. Had to read it in full in Spanish in about a week for a Spanish literature course. The book is basically her complaining about how many offices she had to go to and jargon about environmental laws. The only thing that kept me motivated to read it was to see how her marriage panned out; these sections make up about 10% of the book. Would not recommend.

Mauricio Granados says

It was an scholar read.

Julio Thames says

Libro costarricense. Lucha para la conservación de los bosques. Nos muestra una actitud política corrupta.
