(WARNING: Contains violence, strong language and adult content)

As war rages on across the galaxy, a diplomatic mission turns into a desperate fight for survival.

Captain Peter Fromm: Fromm and his Warp Marines face old enemies and new threats inside a colossal space habitat ruled by a mysterious alien civilization. Their lives and the fate of their country hang in the balance.

Heather McClintock: The CIA operative faces her toughest opponents yet: a race of decadent immortals with godlike powers and murderous urges. Her only weapon is an untried new technology with lethal side effects.

Major Lisbeth Zhang: The fighter pilot risks her very soul when she makes contact with entities from the depths of warp space. Her choices may lead humanity towards a golden age – or eternal damnation.

Corporal Russell Edison: Russell just wanted to travel across the galaxy, meet exotic aliens, and shoot them. These new ETs want to play with Charlie Company, and they are about to find out that Marines only play to win.

**Fantasic**

Great book. Fast paced. Good background and build up to main sequences. Good continuation of series. Eagerly awaiting another book. Couple spelling errors only counted 3 or 4. Worth the time spent reading and money spent buying.

Unfortunately I was not that impressed with book 3, consequently it took several days for me to get through it. Growing up an avid Star Trek fan watching reruns of the original William Shatner Star Trek, it reminded me of too much of an episode that held the same premise - a world inhabited by immortals who were 'bored' and kidnap Captain Kirk and crew members for entertainment. The difference being that they could 'force' the unwilling hostages to participate. I remember this clearly after all these years because Captain Kirk and Uhura were forced to kiss.....very scandalous for a young girl in elementary school! Kissing...ick!

#### **Excellent**

I had read some other books between book 2 and 3 and I forgot how good these books are. This is a really compelling story that brings in the ancient gods as well as fun sci fi. Going right to book 4

#### **Very different but a great read**

I have a lot of SF books I've had difficulty putting down, but this one had me hooked from the first page.

Alert: It is very important that you read the previous books in the series.

I have spent the couple of days packing for my move tomorrow while trying to read this book. I have no idea what is in any of the boxes I packed. I just couldn't put the book down. Looking forward to reading the next, unpacking will have to wait.

#### **Great Series**

Don't mess with the Marines. The galaxy at large are learning that lesson the hard way. In the third book they are invited to parlay for passage thru a warp gate, upon arrival they learn they are other for game of death. Well Marit being Marines, let's say death and destruction follow and the station is now property of the U.S. Warp Marines. Bring on the next book

Great read. Action packed with an interesting if occasionally odd plot. Really enjoying this series so far; hope we don't have to wait too long for the next one!
