Kevin says

I great gift I got from a cool friend of mine, lots of wonderful insights to everyday life, really makes you think, a good book for thoughtful reflection

R.K. Cowles says

1 3/4 stars

Longfellow says

The best 30 cents' investment I've ever made (thanks, fifty-percent-off-books-at-thrift-store-day). Read it today, read it tomorrow, read it until it becomes part of your heart instead of your head.

p.s. Well, I had a lot of momentum at the beginning. Probably best kept in the bathroom or by the bedside for brief, contemplative readings, like a bunch of little proverbs.

Scott Kirkland says

I enjoyed reading thoughts and ideas that reinforce the common human experiences, and touches epiphanies I've encountered in my short life so far.

Abbegale says

The pages each have little blips of what seem to read like the authors journal- you can open to any page and be moved by the honesty of his experiences on the journey towards self realization and actualization.

Jonathan says

Beautiful autobiographical prose.

Brittany says

i loved this book. It felt personal and it affected me and the person I became. A tender and enlightening read when I was 17 and searching.

Jon(athan) Nakapalau says

Very nice early 70's vibe (the 60's are over, what did we learn) - nice 'sitting in the park' book.

Molly says

This book is not your typical journal-style book, which is why I like it. It feels more personal than what most people would publish. I used to read small pieces and reflect on them for a while, and then I realized his writing wasn't quite as profound as I initially thought it was. In a sense, it is the thoughts of a very generic guy, but he is contemplative, gentle, honest, funny, and deep in a way that only 70's era literature can be!
