## **Journey to Otherwhere** Sherwood Smith

Bradford Ellis believes in progress--and in fixing other people's problems. His latest case study, a poor seamstress named Lucy Beale, resents his meddlesome attempts to improve her life. But when a small, stately ship--the Basset--sails into the harbor, Brad and Lucy must journey together to the Lands of Legend. There, the transformative Chimera challenges their assumptions and awakens their imaginations. In this land where fantasy rules and nothing is as it seems, Brad must learn to respect others' boundaries and Lucy must learn to overcome hers.

### **Elizabeth Rawls says**

The third book in the Voyage of the Basset series, and another new set of characters and bringing the reader to learn more of the mysterious, mythical world. Once again, I greatly enjoyed it! Good for all ages.

### **Beth says**

This fantasy tale with an old fashioned flavor is set in England at the turn of the century or start of the Industrial Revolution.

Meddler and inventor-wanna-be Bradford Ellis takes Lucy Beale under his wing, determined to benefit the poor seamstress at his father's school with a classical education during the summer holiday. As part of their education, the two are invited to tour a ship, which takes them on a journey to the Lands of Legend where imagination, not progress and intellect, rule.

The text is unexciting and the premise weak. Because there is little history or explanation behind the magic, the story has no backbone. Lucy is the only fleshed out character with a history, hopes and dreams, and a skill at sewing that materializes into a real occupation. Brad is immature and frustrating, and it is predictable that he finally "gets it" and realizes that Progress is not the key to everything.
