Mine Tomorrow Jackie Braun

Devin Abernathy secretly dreams of escaping to a simpler time. It's why she owns a vintage clothing shop, fulfilling her lifelong fantasy of surrounding herself with period style. All she has to do is slip on a garment to be spirited away to a bygone era—in her imagination, anyway. But lately she's also dreamed at night of a passionate affair with a handsome World War II naval officer named Gregory Prescott, who seems oddly familiar.

Fantasy becomes reality when Devin dons a mysterious estate-sale coat and is suddenly whisked back in time—to New York City in 1945 on V-J Day, where she's welcoming Gregory home with open arms and ruby-red kisses.... All she wants is to stay in his powerful embrace, but to do so means choosing between his past and her future.

Mine Tomorrow Details

Audrey says

So it was reincarnation? I'm so fucking confused.

Rhapsody Phoenix says

This was short and sweet. Not as bad as some reviews says. Which goes to prove that reading is subjective and what is great for one person is crappy for another.

Nicole says

Loved it. I really wish it had been longer.

SuperWendy says

For a story that is only 88 pages long this felt fairly complete. Although it's also the sort of story that once you start pulling at loose threads things begin to unravel a bit. Ideal for those moments when you need a quick, short read but don't have the time or inclination to get sucked into a full-length story (scenario: You're stuck in line at the DMV and you can pull up this bad boy on your phone to read!). A nice way to kill some time.

Lee says

I wanted some mindless distraction this weekend, so instead of starting a new novel, I read this romance novella. Everyone who reads ebooks knows about the novella craze that comes with that format. There're literally thousands on the ebook sites. A lot have holiday themes (the Christmas ones are there for sale already), and others have popular tropes, like this one and its time travel theme. I am currently in a 'time travel' phase. I don't like zombies or vampires or werewolves, but give me a time travel book (or tv show -- Ashes to Ashes is a new fav of mine) and I'll devour it of late. So, the hint of time travel in this cheap (let's face it, paying over 99 cents for a novella is not going to happen) novella was too tempting to pass on. But should I review novellas? Or rate them? I suppose I should, so I remember whether or not I would want to read a novel by the same author again (which, I presume, is the reason they publish them in the first place), but I have vowed to use a different ratings system. Yes, I'll still rate out of 5, but I'm going to do this by comparing them to other novellas, not a normal full length novel. It's like comparing oranges to apples otherwise. So, comparing this to other novellas I've read (all since purchasing my ereader/ipad), I would say this was a great read. The time travel idea had some things which have been used before in other books (the use of a watch for example) but it had one touch that was very original, I thought (I won't say what -- spoilers). The plot and romance did suffer due to the format; they were a little hurried. The writing flowed

easily, however, and there were no glaringly obvious spelling or grammatical errors (which I've noticed in some of the novellas I've read). Would I read anything by this author again? Yes, I think I would. Would I rec this to anyone? Yes, I would. Especially if you like romances and time travel. It was short and sweet and was just what I needed this weekend. Novella rating of 4/5.

Kazen says

What the heck was this? It could have been fleshed out into a full length novel fairly easily as there's a lot of plot but everything is dashed off, slipshod. Girl falls through time! Never mind why! She never makes a real effort to get back - the clothes held her in their thrall, apparently.

Awful but not rage-inducing - two stars.
