Ruptured Moon By Marie H. Stephens

When several murders have been committed in the supernatural community, it is left up to Cassidy and Marcus to figure out what has happened and put a stop to it. Going into the Dotson Pack will have more complications than looking for a murderer. Will Cassidy be able to leave and continue the life she has only known? Or will she choose to stay with Maxwell and be his mate.

This book is really good fantasy book the plot was amazing and so were the sexy parts. I love Cassidy she is an amazing lead female in this series. The only issue I had with this book was the way everything seemed to run together. When Cassidy spoke there seemed to be no space between her words and Marcus's and it was all jumbled together but you could tell who said what. I cant wait for the next book in this series well I hope theres going to be a next book. If your looking for a good fantasy book you found it. WTG Marie. I give this book 5 Stars...
