Surajit Basu says

it's the story of 4 young men who spend a few days and nights on the edge of "civilisation", making one think about urban civilisation.

it's a well-written book, written in the 1960s and yet seems current 50 years later, even in the translation, which is quite good, but slips occasionally.

curiously, the film by Ray is different from the book, both in terms of the events (especially the game) and the characters (esp. Aparna).

both the film and the book are highly recommended.
