## **The Motel R.A. Marvel**

The old hotel sat solemnly by itself on a deserted road just outside a very small town, close to the border of California and Nevada. The building was old, though not as old as some in the area, and not as well kept as those nestled in the downtown proper. Paint peeled here and there, faded by the sun, and the makeshift fence had all but fallen down. There were 20 rooms, 20 queen-sized beds, 20 bathrooms. The building formed a backward L, with the office on the far end and the upward stroke of the L running back away from the highway. In the crook of the L, out of view of speeding truckers and family SUV's heading on vacation, an almost empty artificially blue pool collected stray leaves and dead wasps.

### **Nancy Reynolds says**

I won this book on Goodreads.com

This book is a nice, light, feel good story. It flows well and is easy to read. It would be a good book to take on a short road trip.

### **Beth says**

Very intriguing, interesting story. I really enjoyed the characters and think that this short book might be a good beginning for a longer novel. I would enjoy hearing more of the backstories of the characters and maybe more detail. It left me wanting more, which is a good thing :)
