## Phoebe Hosford says

This book which is the third one in the IQ series named Kitty Hawk by Roland Smith takes place during a car chase along I-95 in the middle of a hurricane. This book is a direct follow up of book 2 The White House where Bethany gets taken. Boone and his team along with Angela and Q get into a car chase with the ghost cell to try to get Bethany back. The only problem is the cell is using five different cars that look exactly the same and they don't know which one Bethany is in. Another problem revealed in this book is that Malak needs to follow through on her mission of turning Bethany over to the top members of the cell so that she can be admitted into the top part of the cell but if she does this Bethany will die and she promised the president she would protect Bethany with her life.

This one wasn't as good as the others but still a page turner. I didn't like how the author suddenly added a supernatural twist to the story. Not sure where he is going with the story now. Q changed a little also, now he talks to himself and his "itch" was taken to a new level. From book 1 Boone has been looked at funny because of how old he and his dog should be. Now we find that they can "blink" to places. Oh, and the dog is super intelligent. Okay.. So I am curious as to what happens next but I don't think I will rush out and buy book #4.

[John Masters also has a Seamaster watch and is a former SEAL. He's brought in to assist when Bethany is kidnapped. It's a huge, intense game of cat and mouse, with a shell game thrown in for good measure.

Malak has passed the test by kidnapping Bethany and is promoted to "the Five". She meets Member Five in the Outer Banks and is soon to meet the other three.

Q's dad is around

It was a very good book and kind of intense.

### **Sam says**

This was an okay book. It wasn't NEARLY as good as the first two, I've read before. This book introduces superpowers with Boone, and brings in a character from another book by Roland Smith that does absolutely nothing. It seemed like for the whole book, people were just driving around in cars, looking for the Tahoe that specific group was following. It was pretty boring. I definitely wouldn't read this over again.

Maybe I wasn't as into this book because it has been so many years since I read #1&2 but this book didn't really interest me.

I have just finished reading this series (or what has come out so far), and I was very disappointed with this last book. Throughout the series, Roland Smith has built a fairly interesting (albeit bland in some parts) set of characters and situation. He pretty much throws it all away in this last book. The thing about this series that made it engaging was that it utilized real-world elements to create a frightening terrorist group. Suddenly Smith randomly decided that the old roadie/ex-spy and his dog should have superpowers!! Brilliant, right? No. This entire book was slow-paced and tedious. Nothing happened until the very end, and even then, very little happened. This book was thoroughly and overwhelmingly underwhelming and disappointing.

This book was original supposed to be the last book in the series but apparently the author decided to create a forth book to the series. This book was full of excitement and anticipation. The main character Q. was mentioned very little, and it kind of jolted between one story and the other. Their where multiple instances where the story could have been improved. for example, While the kids where on the island in the terrorist headquarters boon appeared in the site of Q. and held up the number 3, only the number three though, he did not specify what the three meant and why it was important to them. Somehow the kids knew that he was talking about three min.. In another instance Boon had reveled that he had the ability to telaport, while they where stopped in the middle of the road. he could have told them that he could and reassured them that they where safe before they where left behind in the car by themselves. the book was rather good though as well. Their was a good, strong structure to build on and he took as many chances as he could on writing it. Their was a good overall outcome at the ending. Only the people that deserved it were killed by the S.O.S team and none of the main characters died.

A good addition to the series, this book's best purpose in the story is to truly make the ghost cell into the menacing antagonist that they have been described as. This book is less centered on Malak and more

centered on the different members of the SOS team, which is good for character development. The plot finally kicks into high gear, but some of the espionage is lost in the transfer. Some scenes have risen to be my favorites in series, like John Master's store scene. A good read.

Kitty Hawk is the third book in the I. Q. series. This book starts right where book two left off with the President's daughter being held by kidnappers including Angela's mother who is still posing as the terrorist, Anwar. Q and Angela are in hot pursuit along with Boone, his ancient dog, Croc, and the rest of the SOS team. Complications arise when the kidnappers provide many decoys for the team to follow, a hurricane sweeps through the east coast, and Q's father shows up unexpectedly. This is another good entry in the I. Q. series. I'm looking forward to reading the next installment.

### **Bette says**

In the previous book of this series the president's daughter was kidnapped by the Leopard (Malak, undercover ex-secret service agent and Angela's Mom) at the orders of the Ghost Cell.

Now, Boone, Angela, Q and the rest of the SOS (Some Old Spooks) are following, driving into a hurricane with vicious winds and blinding rain trying to find Bethany and return her to her father, the President of the United States.

At a rest stop Bethany and Malak were transferred to a black SUV but which one? There were four cars at the transfer site and three are decoys. Speed Paulsen, Q's Dad, has suddenly shown up and Boone has a bad feeling about him.

Young adult action adventure yarn with spies and terrorists in Kitty Hawk, N.C. The author gives an overview of politics, geography and history of the Outer Banks (OBX). Very fast and involving story.

Ladies and Gentlemen of the jury, I intend to prove that Kitty Hawk, the third book in the I,Q series by Roland Smith is a very good book with an intriguing and suspenseful plot and interesting characters that make it hard to put down. The story is told in a first person voice throughout most of it, although it sometimes switches to third person limited. It is about a boy named Quest Munoz (Q) and his stepsister Angela Tucker, who are helping to stop a huge terrorist plot. The other protagonist in this book is Angela's real mother, Malak Tucker, a former Secret Service agent who faked her own death and took the place of her sister, who was an infamous terrorist. Malak is helping Q and the others stop the terrorists by infiltrating them. Her double life is one of the main issues in this book. The other is that the terrorists have the president's daughter and are a "ghost cell", which means they can simply go into hiding if needed. The only thing I didn't like about this book was that sometimes it was hard to distinguish between the good and bad characters based on their actions. For example, on page 155 it says, "Ziv and Eben were getting ready to set a car bomb off." Ziv and Eben are supposed to be two of the good guys, but good guys generally

don't set off car bombs. Despite this problem in the book, it is still a very intriguing and suspenseful book. "He crushed the cigarette out, put on his stocking cap, then pushed the cart through the sliding glass doors hoping there wasn't a sniper bullet waiting for him as he crossed the parking lot." A sentence like this instantly makes you wonder what's going to happen next. But when there's a whole chapter after it about a different character, you are definitely kept in suspense. That is just one example of many I could give of how this book is excellent at keeping you in suspense.

Another quality that makes this book a book you want to read are the interesting characters this book has. Just a couple of them that have been mentioned already are "Eben Lavi (a rouge Israeli Mossad agent who had stuck a knife in my neck) and Malak's father, Ziv (not his real name)." Characters like that make this book very interesting. Every character in this book is like that. Though there are too many to name right now, a few more of them are Boone, X-ray, Vanessa, John Masters, the President of the United States, J.R. Culpepper and his daughter Bethany, and so many more.

The final quality that makes you want to read the book is the intriguing plot. On page 84, Boone says, "'The Tahoes aren't there just to throw us off track. They're bombs. Probably all four rigs are.'" As soon as you find out that there are four car bombs going different directions, you have to find out what happens with them. There are many more examples of how the book has an intriguing plot that makes you want to read more. In conclusion, this book is one of the books that make you want to read. It has suspense, interesting characters, and an intriguing plot. I highly recommend this book to anyone that likes a good mystery, suspense or anyone who just likes to read.
