Maybe I just wasn't in the mood, but this one didn't seem nearly as good as previous ones.

Another funny volume of Watamote. I am finding more and more of myself in Tomoko as this book goes on. Which is not a good thing. I was that person who never talked in class, and if my small group of friends (2) wasn't there, I would sit by myself and read manga. That teacher would probably have been the same for me, too--someone I didn't care for because talking in class made me uncomfortable.

It's weird to see a manga character with negative qualities in a school story, which is probably why I like this series so much tbh.

Anyway.. about this volume in particular, aside from the fact I know a lot about the struggle Tomoko has, social wise.. (minus being that much of a pervert):

There was a lot of funny stuff in this volume, and I liked that this volume shows Tomoko is kind of coming out of her shell. She does talk to that upper classman, and the coffee shop guy, and seems to have at least a classmate she \*might\* make friends with. And then there is that other girl, from the end of the book. I was glad that the committee chair girl came back in this book, and was still as nice to Tomoko as ever.. and that Tomoko actually seems to recognize it and appreciate it. I am glad to see some signs of character growth, and hope it continues. We know she probably never will be popular (because a lot of people are on the whole not likely to all befriend a quiet person/gamer/weird person because most people don't want to associate with those different from themselves ), but at least she's getting somewhere.

3.5....

I think I said that I've noticed that Tomoko would probabaly be much happier if she stopped judging people

and assuming they we're as shifty as she is....  
ah well.... i still like the messed up weirdo in all her pathetic social awkward glory.

Why is she so obsessed by and convinced that everyone is having sex?

It's fascinating to me that I can continue to be interested in and fascinated by this series despite it following the same formula almost for every chapter. It might be because the girl is pathetic enough that you're rooting for things to get better for her, but at the same time, just a bit reprehensible to make you irritated with her. She's very unusual for a lead character, especially for manga, and I think that is a big part of the appeal for me as well. She is extremely flawed but there is a spark of genuineness in her character that pulls you in, no matter how many times she sabotages herself. In vol. 5, she has a couple of encounters that lead you to think that things might change for the positively--and I hope they do, because the formula I mentioned earlier is starting to wear thin after 5 volumes. So the creators need to make some changes or wrap it up sooner rather than later.

I need a 'slightly-depressing' shelf.
