Peter Hawkins

**Leadership Team Coaching: Developing Collective Transformational Leadership** Peter Hawkins

Organizations are most effective when the teams responsible for their success function to the best of their ability. When the relationships within the team work well and all members have a clear focus, the team is able to achieve goals more easily. *Leadership Team Coaching* is a roadmap for those who have the responsibility of developing a leadership team. It provides a thorough explanation of the key elements of team coaching and is filled with practical tools and techniques to facilitate optimum performance across virtual teams, international teams, executive boards and other teams.

The fully updated 3rd edition of *Leadership Team Coaching* brings together the latest research in leadership teams and team coaching along with numerous examples to illustrate how to develop people from disparate groups into a high-performing team. With new international case studies throughout as well as a new chapter on systemic coaching, the book covers the five disciplines of team performance, how to select team members, how the relationship of the coach and the team develops through stages, how CEOs can foster effective teams with shared leadership, how to choose the best team coach and more to facilitate effective leadership teams.

### **Alex says**

Very eclectic book covering what different aspects of teams including what highly-efficient teams are, competencies team coach needs to have, with a lot of information on different team coaching instruments, and also laying out in details author's Five Disciplines model and CID-CLEAR process

On the downside the language seems to be a bit too academic
