Callie Ryder's life has forever been about shocking people. She's even doing it for a living - giving sex advice to female callers on her late-night radio show. The ratings, not to mention Callie's popularity as a shock jock, are off the chart, but she's still got places to go....

When Callie's on-air sex tips result in a West Coast book tour, even threats against her "telling it like it is" aren't going to slow her down. Instead, she gets a bodyguard for protection. And not just *a* bodyguard. But *the best* bodyguard—Luke Cardasian. Heart-stopping to look at, he's tough as nails and strong like steel, with animal instincts...and appetites.

A dangerous, sensual, sex-filled road trip.

Who will survive?

I enjoyed the heck out of this book, particularly because it featured an Alpha male military type who was sexually inexperienced and had a heart of gold. Contrast this to the typical Alpha male hero, historical or contemporary, who's so jaded with experience he probably has calluses on his manparts. Luke contracts as a bodyguard to the reluctant Callie Ryder, a shock jock radio personality who's receiving death threats for her on-air sex show. As they cross the country on Callie's book tour, Callie tries to drive Luke off the job by embarrassing him with seduction. Too bad it works out too well...

This is was one of the most different romance novels in that the hero is sexually inexperienced, but then when he got initiated into it by the heroine I was like, "Oh. Typical. He's all macho and strong and can last just as long because he's a man."
