## WHY THE SCIENCE OF PEOPLE IS YOUR KEY WEAPON IN THE WAR FOR TALENT

All organisations have problems, and they nearly always concern people: how to manage them; whom to hire, fire or promote; and how to motivate, develop and retain high potential employees.

Psychology, the main science for understanding people, should be a pivotal tool for solving these problems - yet most companies play it by ear, and billions of dollars are wasted on futile interventions to attract and retain the right people for key roles.

Bridging the gap between the psychological science of talent and common real-world talent practices, *The Talent Delusion* aims to educate HR practitioners and leaders on how to measure, predict and manage talent. It will provide readers with data-driven solution to the common problems around employee selection, development and engagement; how to define and evaluate talent; how to detect and inhibit toxic employee behaviours; and how to identify and harness leadership potential.

Contents are pretty dry, I thought it will be a book about people data analytics but apparently not. Whoops.

Mr. Chamorro-Premuzic's Book "The Talent Delusion" is a fantastic read. As someone extremely interested in psychological profiles, recruiting, interviewing, and training/coaching, this book had a number of great observations that can be utilized in formulating a plan to improve "employee engagement" - although there is a lot in the book for non-managers to contemplate as well. The author's tone throughout the book makes it a very easy read, and his thoughts will definitely stick with me. Well done!
