The True Story of the Bilderberg Group Daniel Estulin

Delving into a world once shrouded in complete mystery and impenetrable security, this investigative report provides a fascinating account of the annual meetings of the world's most powerful people—the Bilderberg Group. Since its inception in 1954 at the Bilderberg Hotel in the small Dutch town of Oosterbeek, the Bilderberg Group has been comprised of European prime ministers, American presidents, and the wealthiest CEOs of the world, all coming together to discuss the economic and political future of humanity. The press has never been allowed to attend, nor have statements ever been released on the attendees' conclusions or discussions, which have ramifications on the citizens of the world. Using methods that resemble the spy tactics of the Cold War—and in several instances putting his own life on the line—the author did what no one else has managed to achieve: he learned what was being said behind the closed doors of the opulent hotels and has made it available to the public for the first time.

Hans De Jonge says

Great book about the Bilderberg conference: The masonic secret world government preparing for wars to enslave the world. Concentration of psychopaths to prepare for the New World Order. Under the secrecy of states security they have yearly gatherings in expensive hotels over the world and make decisions no ordinary citizen may be aware of. The first book about the true implications of tolerating such a clan of sick powerful entities having secret meetings under the full protection of "democratic" elected governments. A contradiction in terms. This book is a real must-read!

Knowledge is power.

Eve says

Stunning and disturbing, but a must-required-read if you care about your family, your health, your money, and your future. Your world will be changed forever if you want to be enlightened. and proceed in your life with an informed understanding of how the world, locally and globally, has been operating for eons. This will change the direction in all your choices.

Benjamin says

Ok, I totally need to stop reading shit like this. Conspiracy theories have a way of making you distrust everything and everyone. It's just that I don't buy the explanations our leaders give us for the stupid shit they do. At least these whacked-out theories make sense to me on some level.

Vannessa Anderson says

Before you enter the voting booth, it is essential that you read *The True Story of the Bilderberg Group (aka The New World Order)* but, I must caution you not to become disillusioned and not vote. Being an independent student of politics, I have read many books on the subject and have learned a great deal. *The True Story of the Bilderberg Group* is the first book I've read that actually explained how the United States and World Politics are interconnected and how that interconnection affects the 99%.

I believe the best way to review *The True Story of the Bilderberg Group* is to let the book speak for itself.

Quotes from Book

The Trilateral Commission doesn't secretly run the world. The Council on Foreign Relations does that. P. 65

John F. Hylan, Mayor of New York, ... “The real menace of our republic is the invisible government,... p.78

Our job is to give people not what they want, but what we decide they ought to have.—Former President of CBS News, Richard Salant. P. 89

...David Rockefeller... “We are grateful to the Washington Post, the New York Times, Time magazine and other great publications, whose directors have attended our meetings and respected their promises of discretion for almost forth years” ... “It would have been impossible for us to develop our plan for the world if we had been subjected to the lights of publicity during those years. But, the world is more sophisticated and prepared to march towards a world government. The supranational sovereignty of an intellectual elite and world bakers is surely preferable to the national auto determination practiced in past centuries.” P.92

...For most of PBHS’ history, funding was provided by AT&T [a CFR company]; Archer Daniels Midland, whose Chairman Dwayne Andreas was a member of the Trilateral Commission; PepsiCo [a CER Company], whose newly promoted Chief Executive Officer, Indra Krishnamurthy Nooyi, is a Bilderberger and Trilateral Commission Executive Committee member, and Smith Barney [a CER Company], one of the world’s leading financial institutions. Furthermore, Smith Barney is interlocked with Citigroup Inc., a global financial services company that is a member of the Bilderberg Group, the CFR and the Trilateral Commission. P. 153

The magic word is **monopoly**, “an all-encompassing monopoly” that not only controls the government, the monetary system and all property, but is also a “monopoly which, like the corporations it emulates, is self-perpetuating and eternal.” P. 164

To the Rockefellers, reports Gary Allen, “socialism is not a system for redistributing wealth – especially not for redistributing their wealth – but a system to control people and competitors. Socialism puts power in the hands of the government. And since the Rockefellers control the government, government control means Rockefeller control. P.166

... The one thing this self-appointed “cabal” of financial aristocrats is most afraid of is a public revolt, because they have been the masterminds behind one of the most devastating revolutions in history.... P. 188

Things to Ponder

- ~ Was Nixon framed for Watergate
- ~ Did The Bilderberg Group order the hit on the Kennedy Brothers
- ~ The media is owned by The Bilderberg Group who, when given the orders, print false and misleading information
- ~ Why has every U.S. president since “Ike” Eisenhower has belonged to the Bilderberg Group.
- ~ The Logan Act was intended to prohibit unauthorized United States citizens from interfering in relations between the United States and foreign governments. There appear to have been no prosecutions under the Act in its almost 200-year history.

I found ***The True Story of the Bilderberg Group*** an informative and provocative read.

John says

This was a total waste of time. It was wacky, but not wacky enough to be entertaining. Basically, the Bilderberg Group, Tri-Lateral Commission, and Council on Foreign Relations run the world. And the Rockefellers run them. The end.

This guy also needs to do some fact checking, because I'm pretty sure the Pentavirate runs the world. That would be the Queen, the Vatican, the Gettys, the Rothschilds, *and* Colonel Sanders.

Everic Rivas says

Incredible read! Meet the puppetmasters. Everything the author has covered in this book is backed up by other researchers's findings. But one doesn't have to look further than the news to identify the world events that have transpired since book's publication. An essential book to understand the broad agenda of this nefarious group. Note: both leading Democratic candidates Clinton and Obama took a break from their campaigns to meet with this group during their meeting in Chantilly, VA (<http://www.globalresearch.ca/index.php...>).

No says

Another book that fails to connect the obvious dots...

They say that 'money is the root of all evil' so what you need to ask yourself is 'who is at the root of all money?' Look at who founded the federal reserve and what type of people has run it since it's inception. Look at who has a complete control of the media, thus controlling the masses'. Look at the founders and heads of groups like the CFR, TC, and Bilderberg Group. These NWO books just say the names but look into those names deeper and you will see the common thread of the Jewish race and Zionist ideology. Its not just "rich people" but rich jewish people with an agenda with lots of help from Zionist traitors who sell out for money. Not having this knowledge would be like watching a 3D movie without the glasses. Having it gives you the bigger picture and unlocks an entire new set of doors.

I started this book and put it down a few times before I finally finished it.

Daniel Estulin is a Russian who lives in Spain. He's excellent to listen to in a radio interview, but his writing can feel a bit "all over the place" to me.

Still, the content of this book is important enough to warrant perseverance.

There are several non-governmental organizations - the "round table" groups, the Club of Rome, the G20, the European Union, The Council on Foreign Relations, Bilderberg, the World Bank and IMF, and The Trilateral Commission - just to name a few - who meet to discuss policy regarding issues that are of interest on an international or a transnational level. It is the stated mission of such groups to strategically create impacts on world economy, law, politics, and society. Yet, NONE of these organizations consist of members chosen by democratic or republican processes within the respective sovereign nation states from which they hail.

Instead, their membership consists primarily of a self-appointed elite, either hereditary or intellectual/financial, who - often enough - meet in secret to discuss their plans to influence the governments of nations around the world.

We like to believe our nation is sovereign - that our constitutional republic is still intact, and that groups that encourage international cooperation exist to increase freedom and rights for citizens around the world. However, the evidence for this pollyanna view of globalization just isn't there.

As the influence of international bodies and the unelected groups that influence them grows, the sovereignty of nations necessarily diminishes. We see this whenever a change in World Bank policy influences laws in the United States, or when a collapse of one nation due to debt obligations becomes a global collapse, due to the bonds of treaties like Maastricht - which we see, are stronger than the decisions best for a nation like financially-stricken Greece.

It is against United States law for serving officials of the government to participate in policy making with non-elected officials. Yet, in direct violation of this law, many government workers and elected officials attend Bilderberg, year in and year out. These discussions are never made public, and the meetings themselves are rarely reported on. Members of the press who attempt to discover what attendees are discussing are turned away by armed guards. Some are even followed and arrested.

If we wish truthful answers to questions like, "Why do we still have a Patriot Act?", "Why are there more and more former corporate heads involved in conflict-of-interest-laden policy making?", "Why aren't we taking any steps to end our involvement in foreign wars?", and "Why did we continue the Bush bailout of Wall Street?" perhaps we need to look no further than the undue influence of outsiders on our political process.

This influence is - as many cynically point out - nothing new. Still, it is reaching critical mass in our life and times. Either we will do something to reverse the course of the erosion of our sovereignty, or our grandchildren will live to regret our choice not to.

Meteori says

Kome su ekonomija i politika mrkse teme neka ne po?inje ?itati ovu knjigu. :)
Sve u svemu, s obzirom na tematiku, nije to loše. Na momente je pomalo suhoparno, ali je to i o?ekivano. Od ranije mi je bio poznat podatak da svijetom upravlja ša?ica ljudi, ali ne i to da su infiltrirani u sve društvene pore po?evši od politike preko bankarstva, ekonomije, industrije i svega ostalog. I ta mreža je toliko isprepletena da ništa nije slu?ajno.
Zanimljivo je jedino što njihov najve?i strah predstavljaju široke društvene mase. Me?utim, masa kao masa, brzo padne pod uticaj. Medijski je uglavnom dovoljan. I na kraju svi postanemo ovce za šišanje.

'The Bilderberg Group' bases its premise on the secret operations of the world's most powerful people, claiming to show readers how the so-called "masters of the universe" rule the world. It's interesting stuff, to be sure, but overall this book suffers from bad editing and dubious sources. I bought it in the hopes of finding some solid research for my thesis, yet the author's use of obscure, meaningless, or irrelevant sources (sometimes even quoting himself, which I find incredibly annoying) makes it difficult to see it as little more than just another title in the 'conspiracy theory' crock.

I WOULD RECOMMEND THIS BOOK TO: people who have never heard the term 'Bilderberg Group'; conspiracy theorists; P.I.s/individual kooks looking for some tips on secretly stalking large groups of people

Kates says

I'll be honest, I did not finish and maybe do not intend to. Brings up interesting things to discuss, but it read too much like a disorganized text book for me.

Kim Taras says

Disturbing to say the least. I'm not even going to get into it because people think it is crazy. No one wants to believe it because it is scary. This is a good book on the topic if people want to actually know what goes on other than Lindsay Lohan going to jail or cats doing cute things.

Travis Kirk says

I use to think these secret societies were a bunch of crap. Then 911 happened. Then Loose Change appeared and the rabbit hole began to take shape.

As for my review, the book promises more than it delivers. Books shouldn't do that. It's not nice.

If you have never heard of Bilderberg/Trilateral Commission/Council on Foreign Relations then this book is

a decent place to start.

Doug says

A conspiracy book stranger than most I've read, in that odd chapters are devoted to the author's first-person run-ins and adventures with characters of the intelligence/security underworld, while the remaining chapters attempt to dissect the shadowy proceedings and agenda of the Bilderberg Group.

Unfortunately this is yet another book of this genre which could use better editing. On one page, we read "adviser", and on the next, "advisor." But it's not just this. Estulin makes reference to "the United States counterintelligence service" (or "division", I can't recall), when there is no such generic entity. Does he mean the FBI's department, or the National Counterintelligence Executive, or the CIA's?

There is also a "Paulian" advocacy here (I'll reserve "Paulist" for the traditional reference to Saint Paul), as in Ron Paul. Though Estulin is Canadian, he seems to sympathize strongly with this strain of American Constitutionalism, though he expressly claims to disagree with the politics of the newspaper American Free Press, for example, a staunch supporter of Paul, from what I can tell.

The most curious twist, for me: not the facsimiles of the secret documents produced in the appendix, but the author's mention of the Russian poet Afanasi Fet in the concluding chapter. A volume of this 19th century poet's verse figures as the emotional anchor here, when Estulin is interrogated, he claims, by Italian police. Rather touching, all things considered. Verse gives hope; literature sustains.
