There are plenty of better books on personal finance. Had nothing but generic advice on budgeting/saving, nothing really of value that couldn't be obtained from a cursory glance of a Google search.

That was a book that everyone wants to read, it is not just a book with a boring budgeting issue telling you do and don't!!! Absolutely not. That book offers you stressless funny way to buy and get what you want without ending up to be a broke in the end of each month.

I -as many people- have always struggled with the budget thing and I read many books on that subject but they were sooooooooooooo theoretical and boring. That BOOK is totally the opposite. The writer lives on our planet and lives our life which makes more sense.

That book -as I assume- required huge effort to come up with all those ideas and I also assume that the author has brought all those ideas and steps into practice before he wrote that book which makes them -no doubt why- so practical and easy to manage.

Not only, the author embraced a "healthy" financial life style that is still flexible and actually fun to do, but also he encouraged the communication between the spouses or the house hold individuals which would even make the system work better unlike any other financial situation when you find everyone is arguing about whose fault it is.

I am really happy that I took the chance and read that book cause I think it will change the way I used to think about budget and money forever.

This book is very good first book for young people. It should be in the reading list of every high school student. Yes - even I learned a few things and it reminded me of others.

I admit it. I am a money managing nerd. I am the stay at home, homeschooling wife of a school teacher. Our budget is always tight; and, I can't 'make' money, but, I sure can 'save' it. It's my job to make sure the paycheck lasts till he brings home a new one. I've read allllllllll the books...the good, the boring, the impossible...Total Money Makeover by Dave Ramsey, How to Get What You Want Out of Life With the Money You Already Have by Carol Keefe, and, Winning with Money are my top 3 picks for anyone wanting to live beyond mediocre.
