When Game Warden, Eden StCloud, goes up against CEO, Monroe StoneCrow, she encounters the most intimidating, powerful, and sexy man she's ever seen. Unaware of the fact that Monroe is the Dominant Skin Walker in North America, it isn't until Eden becomes enmeshed in his life that she realizes it's too late to escape. Worse, she's drawn the children under her care into the lair of the beast and must now succumb to Monroe's desires or risk losing her children forever.

CEO, Monroe StoneCrow, is a man tormented by his obsession with creating a haven for his Skin Walkers. Determined to form a community where his Walkers can exist in peace, he has no time or desire to seek out his own mate, his angel. When Eden StCloud crosses his path, there is no denying his instant attraction, or his overwhelming animalistic urge to claim her. His affliction is so intense that even his own medical experts are at a loss to ease his symptoms. With his Skin Walker refuge in danger of collapse due to his preoccupation with Eden, Monroe is stymied by his inability to do what he's always done...simply take what he wants.

Monica **can't read fast enough says**

I won an audio copy of Monroe, and boy was I lucky! This was a fantastic listen and I can't believe that I haven't gotten on the Skin Walker bandwagon before now. I love a good paranormal series that focuses on one couple at a time and that is exactly what Bliler delivers in the Skin Walker series. If you are a fan of stories like Laurann Dohners' New Species series this would be a good addition to your reading list. I had no problem reading this one as a stand alone, but I know that I have missed some goodness so I will have to go back and read from the beginning soon.

Monroe is the leader of the Skin Walker community and has set out to create a haven where other Skin Walkers can come together and establish their own fully functioning and self sufficient community. Monroe is determined to give his people a place where they can feel safe, raise their families, and be free to live their lives without the interference of outsiders. Monroe didn't expect to find his mate when he went up against the riled Eden, but he was immediately attracted to her attitude and determination to protect what she loved; her children and her mountain. Monroe is the alpha of all Walker alphas. He knows that it will take a particularly strong willed woman to handle both him and the role of the female alpha to his pack. Monroe isn't sure if Eden is his mate, but he knows that he is very attracted to the confident and independent game warden.

Eden is a woman with a mission. As a game warden, Eden is charged with the safety of both the people on her mountain and the welfare of the wild animals that live in her area. Eden takes her job very seriously. When Monroe comes into the area making drastic changes to the landscape she isn't afraid to confront him over what she feels is going to do more harm than good to the environment. Although Monroe claims to be building a wildlife refuge and rescue community Eden knows that there has to be more going on than what he is willing to admit to. Both Eden and Monroe are harboring secrets that are more closely connected than they know. Eden has adopted a group of abandoned children and forged a family and a life all on her own. Eden will stop at nothing to protect her children no matter who or what she has to fight.

Monroe is a well written paranormal romance with steaminess and love that doesn't happen lightening fast. The story is nicely open ended so that we know that there is much more story to be told, but without the dreaded cliffhanger. Monroe is a complete story in itself. I look forward to reading more of this series!

Interesting take on shapeshifters. Not the worst paranormal romance, not the best. I'm not sure I liked the whole intimidation, submission thing. I was interested in the story and liked it (somewhat) but the romance section did leave me a little conflicted. Could have been much better.

This book was soooo worth the wait!! I finished it the same day I bought it. Can not wait for the next book in the series. I hope its York's story!!!

I absolutely just LOVE Susan Bliler's writing!!! SW Monroe is one of the long awaited books to be released and I am not disappointed in the least after reading it. :) Before I go into "details" with my review, I need to make a point that I will not give away to much detail. PERIOD. I strongly believe that a review that does can spoil it for readers to come. They can also cause the reader to look for those parts in the book, which again, can ruin it. Another thing I can't and WON'T do is write a damn book about the book. I mean COME ON! Say what you like or don't like and STOP. (Only my opinion.) Plus, READ THE SYNOPSIS ABOUT THE BOOK. :) With that said:

Monroe is a very Dominant Skin Walker in this read and if you like that, OOOOOH MY! If not, you will. LOL Then you have Eden who is a very strong willed lady who is a Game Warden for the State's Dept of Fish and Wildlife and Park. BUT she is also considered a law enforcement officer. :-0 Put them two together with a bunch of friction, animosity, sexual tension and..Yup - SPARKS FLYING BABEEEEEE. You will also get to hear a little bit about SW history and a few more great tid bits in this one. Not to mention there are other characters and exciting things that are also going on in the book that will keep you glued to the story and begging for more when you finish. I think I like this one the best so far.

Now, unfortunately, I do have a little complaint with how this one was written. I got quite confused a few times while reading it because I didn't know who was thinking/saying what at the time. Sometimes Eden would be thinking/talking and then a phrase would come along and throw me for a loop because it wouldn't fit quite right with her way of thinking. It would turn out to be Monroe doing the thinking/talking. And vice versa. But I wouldn't figure it out until after I had to stop and reread it a few times. So, hopefully in the future books from Susan she could either put the name of the speaker within a break in the paragraphs or have their name in hyphens or even use the saying as a quotation, that would help tremendously. (Boy I hope I explained that well enough.)

I still highly recommend this read. If you like Susan's other SW books, you will love this one. Hell, if you like ANY of Susan's other books, you will love this one. I can NOT wait for the next "few" to come out. York, Gauge, Redknife...ANY SW will do. :) Soo, happy reading and be prepared for some drooling and wishing you had a SW for yourself!!

I was sooo looking forward to Monroe's book as he is one hot alpha male and he was my favourite in the series.

The heroine Eden, once again let this book down. She was just too combatively stubborn, even towards her own safety. I did not like that she uses her children as a crutch against life.

Monroe as the head of the Skin Walkers needed someone tough, smart but also soft and I did not feel that Eden brought this to their relationship.

I think Susan tried to show Eden as tough but she just came across as a bully when she tried to use her position into imitating Monroe and his men. That scene with the cars did not show strength of character at all.

Her soft side only came through with her kids. There was nothing about her that made you want to be her friend. When things got tough she took her kids and ran. I just could not like her no matter how hard I tried, I think I could not get over how she used her job by bullying Monroe and his men.

The relationship build up was not strong enough for me. The sex as always was hot.

For me this was a disappointing read as I had huge expectations for Monroe's book. There was no action or fight against the bad guys. Seeing as there was no drama the romance should have been the crux of this story but I did not feel it.

I will continue with this series as it still has a lot of potential, I just wish Susan writes better heroines than what she has been giving us so far.

This was completely unexpected. I thought this was going to be a cute and short read. But, no, this was amazing. I really liked it. I read Monroe instead of book one in the series, King, because I have a thing for head honchos.

I liked Eden, she was badass and fierce.

Monroe was okay, I liked him, but I didn't love him. Sometimes I read his voice with an accent in my head. The supporting characters were great, without them I don't know if the story would've been as good as it was. Monroe and Eden's relationship was amazing. I loved that it wasn't fast and easy. They had regular troubles, and their love had time to grow.

Monroe was fierce, and never gave up.

“And if I hadn’t forgiven you?”

He smiled and leaned down to kiss her briefly. “I’d have stayed until you had. I refuse to lose you. I refuse!”

I really didn't like the unnecessary explanation points, and Monroe's need to yell unnecessarily, that's the reason I'm not giving a full five stars.

???? !

I expected more action and more pages to read other than that it was good and crave more...

Future Slayer Girl says

I don't think Susan is going to write a Skin Walker book that I don't like! (knocks on wood)

Susan has become and auto-buy for me since the first book I read, Conn.

I love books about men that are all Alpha, and got a little bit of animal in them, they growl, snarl, and the world MINE rumbles out of their chest like a barbarian. Seriously, I don't care how non-feminist that is. I like the books, get over it!

Monroe's book was a really pleasant surprise. It was a bit different than the other books, and Monroe was ten times the Alpha--well he is the Alpha of his people. His chest bounding made me so hot I was screaming into my sheet when he would get all hot and bothered and told Eden exactly what she was going to do, how she was going to do it, and what was going to go down between them. Once the 'mating' took effect with the halo--holy holy holy!!!!!!

It was so brilliant to see that, and it was even more brilliant to see Monroe be humbled by his little woman. I think she might even be WORSE than him. I respect any woman that is strong, independent, and has mamma bear instincts.

Can I just say that I LOVED the scene when she left him, and he showed up in the hotel room to explain himself. I cried, I laughed, and I felt so connected to Monroe in that one scene I wanted to reach into the book and crawl into his lap myself!

Another win for Susan and her Skin Walkers!

Jude says

I have read and liked the previous books but not this one.

Except for their love and devotion to abandoned skinwalker children, I didn't care for the hero or heroine. I understand that he was the premier alpha leader and needed a tough woman at his side but I felt that he was just arrogantly domineering and she was high-handed and tiresome.

Song Choice: "Taking Control" by Easley, "Too Afraid To Love You" by The Black Keys, And "Lonely Boy" The Black Keys.

First thoughts: Okay I am a seasoned, veteran reader of Susan Bliler. I am pretty sure my first book with her

was Territory - and from then on I was hooked. Nothing could stop me! I was an insta-fan! With her last release Leto I found myself yeah still in love but also I don't know it wasn't my favorite Susan book - sorry Susan if you reading this and you are like BITCH! or if you are a huge Leto fan and you are still going BITCH! but honesty is the best policy...unless you are wrong. haha anyways! I found myself eating this up and positively in love. Such a beautiful story, mixed with that hot, chemistry lusty feeling at first mixed with, holy hot sex, and swoon. Anyone following this series has probably been waiting for Monroe to get his, and boy does he! BWHAHA.

Thoughts on Plot: It started out pretty quickly as most of Susan's books do which i love! And if you have any experience with this series then you know that yeah they have the soul-mate rule, kinda, but anyways i was pleased with this book because it took a while for this to come into play. the characters had been through stuff together, they were at each other throats it was fun to unfold. Okay yeah most of the real action-y action is in the beginning and sort of fades off but i was never bored with anything else that happened. I liked watching their relationship progress, it was very, very entertaining.

Oh...holy hot sex.

Characters:

(okay i have found myself doing this more and more casting of characters)

So say hi to Edie - not Eddie ;)

And a howdy to Monroe:

Edie: is fierce! I really do love her, she was so self-less, and such a mama grizzly she is dangerous. She love nature, and she fights for what she wants. She is a good main girl character, not too whiny, not too badass with her i don't like to be weak stuff - i do understand that but at times its like we all have our weak points. I like Susan's characters as well because they weren't all the same girls and they aren't all the same boys. Anyways she was really good character, very loyal but scared to trust.

Monroe: Welp! He takes Alpha male to a whole new level really. Like i thought the other boys in Susan's books were bad-ass but my God! Monroe is one possessive man. And very demanding, and controlling ;) ;) I liked it i did, I don't think he was sooo bad that i was like dude back the fuck up or anything because yeah i would think he would fun as hell to mess with if i could get away with it.

The kids....? I am not sure if the summary goes over this - honestly I saw a post on facebook that this was released and i one-clicked it and started reading. So i thought at first that they were going to be pushed into the background and completely, almost forgotten about but they weren't and i loved that! It gave the book this heart-warming story. I loved it :D great aspect in this book honestly.

The ending...good, very good :D I want Gouge's story and i want to know a bit more about it please! and thank you susan I love you keep writing forever :D

So if you want to check out how i felt about other amazing reads feel free to stop by this thing called a blog that i have. yay for blogs....

I'm just going to say this series is brilliant!

Love the alpha males characters in this series.

Monroe head of the North America skin walkers finally meets his angel.

The story is gripping from the beginning to the end, I can't wait for the next one to be released.

Monty Cupcake ? Queen of Bloodshed ? says

Wow, Monroe, the male mc, is a giant douchebag. I hated him and his book. I really only read this trying to figure out the mystery of what the doctor was doing, but unless it's exterminating all these characters, I no longer care.

Monroe wants Eden and when she says no to it & anything else in the book, he manipulates her. He uses her children against her and uses them to get what he wants. He should die. Kick to the ballsack. Boom.

No words can describe how much I love this series. From the awesome and believable characters to their problems and their situations..... Such a recommendation there are no words to describe how much I adore this series.... I am just gonna sit in a corner and slowly die until there is another one to read....

Couldn't stand the mc's. Too many eye rolls for me to continue

TravelingGal says

3.5 stars. There were a lot of things I liked about this book - the H and h, the kids, smexy stuff, and overall development of their relationship. The h in particular was really good. Overall, an enjoyable read.

However, I have one big issue which made me round down - she changed the rules! In the previous books, we are told that as soon as the Skin Walker meets his angel and looks into her eyes, he is hit with the bond. Now we are told that it can happen later?! WTF? While I would have been fine with that from the beginning, changing it now is annoying. Also, it makes me think that maybe Shy could have been with York - who was

so much more appealing than Leto - after all, if they had just given him the time. (And just what is up with York and Shy's sister? And that isn't even the next book!)

One smaller nitpick - the whole tearing up the mountainside issue just disappeared.

And finally, please, please look up the difference between vicious and viscous! I can overlook most of the editing mistakes but that one throw me out of the story every time. It was even worse in Leto but the fact that it continues in this book just makes me cringe.
