Love the characters and the story line. Liked that it was straight to the point and not all over the place

the entire series is really great!!!

Heidi Petersen says

I really enjoyed this set of books, they were Hot with a capital H. I don't understand why they were brought out in 6 parts, 1 full novel would of been better.

Siriniti Kidd says

steamy ending

I LOVED the whole series. I really loved you way you gave Cole a heart. I could really feel everything he was feeling.

I wish you had added one more book to the series to make it complete. When Cole went to his brother for advise and you described how he was holding his baby niece Alexandra, my heart melted. We all saw the real Cole at that very moment.

It would have been great to have us readers experience Abby and Cole's first child. His overprotectiveness, his capacity for love and the love of his first child would have pushed me over the sappy weeping edge. If you can't add another "final" novella, maybe you can add it to Tristan and Beccas story.(maybe help that writers block). Pleeeease?

This series started a little shallow for me but grew into a really enjoyable read. Definitely worth your time to read.

This book was everything you needed to complete this series. I love the chemistry of the main characters. You feel like you know them. Absolutely enjoyed this book and this series. Looking forward to whatever is next hopefully Cassie writes a story about Becca and Tristan.
