Indestructibles are the books built for the way babies read. They are 100 percent baby-proof, chew-proof, rip-proof, and drool-proof. Printed on a unique nontoxic, paperlike material that holds up to anything babies can throw at it—gumming, spilling, dragging across the floor—*Indestructibles* are the little books that could. They're indestructible. And if they get dirty, just throw them in the washing machine or dishwasher.

Baby Faces features baby's favorite thing: pictures of other babies. It's a book for parents and children to share together the many moods of a baby.

Avonlea Rose says

On the whole I liked this book. It is a perfect starter book for a baby still getting used to holding a book and who is still exploring facial expressions. It also remains a good book for toddlers learning to identify, name, and express emotions when an adult can help direct and encourage them to make those connections. My only comment is that I sort of wish the words labelled an actual emotion.

Kevin says

Finally, a book my six-month-old son can sink his teeth into! Literally! The book is made for babies to chew on it. The illustrations are colorful too.

Kasey Hughes says

This book is very cute, and clever. The pictures of the baby faces though out almost take up the whole entire page, and are the main source of illustration within the book. This book is cute because some of the babies are brushing their teeth, sleeping, or laying with their favorite stuffed animal. You could easily engage a child by asking what face they make when they are doing those things, or which one is their favorite. This book is silly, and any child would enjoy looking threw this book.

Beckie says

Great for little hands. As each page only has one word and we've read this book so many times now, my 2 year old feels like she's reading because she's memorized what the pages all say and is quite proud of herself. Cute pictures.

Bree says

I really love the idea of these indestructible books. These are the kinds of things you wish for when your baby is tiny and destroying every book with their hands and mouth. Totally brilliant. Perfect for chewing and spills and rips. Baby faces is a very simple book with minimal words but full pages of pictures perfect for a little one.

Haakon says

All tiny babies need at least one of these for chewing in that phase where paper looks delicious but grownups

won't let you eat it.

Lee Ann says

Simple with colorful illustrations. Good way for young children to learn how to express emotions, and touches on opposites. Love the material -- it truly is indestructible.
