Resurrecting Home A. American

Against all odds, Morgan Carter and his family have endured despite the deteriorating conditions surrounding them. Armed with survivalist tactics, Morgan's crew, alongside their new friends from the recently-liberated DHS camp, have worked together to build a sustainable community. But not all situations can be prepared for. When a massive wildfire threatens their very existence, they must decide: fight or flight?

From the author of the hit Survivalist Series books, Resurrecting Home is an action-packed adventure that depicts the harrowing possibilities of a world gone awry, and the courage it takes to protect what matters most.

Darcy Leerhoff says

Increasingly loosing interest in this series...idk why...not enough inter-personal dynamics maybe

Tracey Mccall says

Brilliant

What am amazing series so far, I loved it. Such an amazing story action packed front to back. Characters that jump right off the page, leaving you feeling like you have known them your whole life. Excited to read more

Patricia Fuller says

So I'm WAY into this series and enjoying them, however, Just like the first three, I loved them for the general concept and education I received. The writing of the story was good too, but the dialogue is awful. There were a lot of typos.

Tom Porter says

A great book

Ok,ok... maybe this was the slowest of the series so far. I am sure I am not the first to say it. The book ended on a high note. I am sure the next will be crazy.

Brigitt says

Love this series of books!

Anthoney says

This is really a 2.5. Too much firefighting.

Tracey Love says

Continuing to witness the bravery, persistence, and ingenuity of Morgan and his family and community

made book 5 as exciting as the rest.

Philip McDaniel says

I have enjoyed this whole series. I will warn you that this series will make you paranoid. The storylines are completely believable.

Nathan says

Just as good as the first 4! Kept me on my toes until the end with regards to the fire.

Vicki Jowers says

Great Book

Great read the whole series is a good read. I recommend all of them they are page turners glad Shawn Chester recommend him

Joseph Santiago says

This survivalist series was a bit annoying as it based most of conspiratorial plot on the government getting people dependant on the state. After people needed welfare, food stamps, assistance in any form they were somehow not as worthy to freedom and would blindly comply with the government. This political philosophy is wrong in my eyes, but there are some that believe this. This is just a story and I enjoy the DHS jokes. The book has spelling errors and is not a mainstream published book. I like that about it and the story is good. The is good for me because it follows a few people and their adventures while imparting some prepping knowledge. This book does not have a lot of surprises but it is an easy and good read.

I can't wait until I begin the next one! Readers become increasingly drawn into Morgan's world. The story continues, and I can't wait until beginning the next one!

Carolyn says

Recently read all five books in this series. Basically each is a how-to of tips for post-apocalyptic survival

woven together into storylines about a man (Morgan) and his family (wife and three daughters); a man (Thad) and a young girl (Jess) whose families have all died/been murdered; and a gnarly old ex-soldier (Sarge) with a small crew of other ex-soldiers.

The titles really tell the essence of each book. In the first, *Going Home*, the country is subjected to the collapse of the entire power grid and Morgan has to travel 250 miles, mostly on foot, to return to his home and family. Along the way, he meets Thad and Jess and Sarge. In the second, *Surviving Home*, the great difficulties of post-apocalyptic life become more and more real. In the third, *Escaping Home*, they decide they have to leave their very well-appointed refuge/bunker/home for another location that is more isolated and, they hope, more secure. In the fourth, *Forsaking Home*, all four friends are reunited and form a new community with few resources but strong personal ties and good potential for the future, whatever it may hold. In *Resurrecting Home*, a huge, intense wildfire threatens the community and its welfare is further endangered by marauding bands fleeing the fire.

The writer seems a bit of an amateur and could have used additional editorial assistance, but the vast extent of his research into survival skills shines through. "Mr. American" is to be congratulated for sharing his knowledge through this series. I enjoyed hearing the stories of the main characters in a sort of a tales-around-the-campfire way. I did come to care about Morgan and Thad and Jess and (even hard-ass Sarge) and wanted to hear about what happened to them, how they made out. Not great literature but definitely fun (and interesting) to read. And probably the most enjoyable survival manual ever written. Listened to all five audiobooks narrated by Duke Fontaine.

Kristi Richardson says

This is the fifth book in the Survivalist series so it obviously has a following. I received an advance copy through Penguin's First to Read program.

This was the first book I have read in this series and I felt a bit lost at the beginning. I had no knowledge of what went before and perhaps there should have been a forward or short synopsis for those who couldn't remember or started in the middle.

The characters are well drawn and interesting. I liked the writing style but because I hadn't read the earlier books can't give it more than a three because I had a hard time relating to the people.

This is a great book for people that enjoy dystopian futures and serial books. If you realize there is never going to be an ending until the books no longer sell or the author dies.

Dave Hay says

Book 5 of the *Going home* series, and it is still going strong. The story line is a medium paced plot, but does not bog down. New challenges await the group of preppers as well as the military types. Enough going on to keep the interest up, and the series going
