Saber-tooth Jordan Summers

Book 2 in the Phantom Warriors series. Katy is tired of being sent on wild goose chases by her boss. And this latest job is a doozy. He wants her to go to The La Brea Tar Pits to trap a saber-tooth tiger. Talk about an impossible task, they haven't existed for over eleven thousand years. Kegar knew he shouldn't have shape-shifted and snuck off the Phantom warrior spaceship without permission, but he was eager to begin his search for a mate. The last thing he expected was to be shot in the flank by a beautiful blonde female bent on making a science project out of him. Awake and naked in his human form, Kegar finds the woman of his dreams bending over him. What's a feline in heat to do? Pounce, of course. He only has a few hours to convince this professional tracker that she's his perfect mate. It'll take all Kegar's sensual skills to bring out the hidden wildcat in Katy. Luckily, he's more than up to the task.

L.A. Miller says

The second in the series, interesting and enjoyable if you are looking for a quick read on a Saturday afternoon.

Annelise says

Sure enough, it's a fun, funny, short, sexy story.

Renee McIntyre says

Nice short read

It was well written. Didn't give a lot of backstory but still explained itself fairly well. A good short read.

Andrea Dehart says

A page turner

A real page Turner. I could not set the book down. There are a few errors that distract from the story.

Scooper Speaks says

Lame

Isabel says

mucho sexo poco argumento o historia.

Daniela says

(Explícito) Igual de absurdo que el libro anterior pero casi nada de romántico esta vez. Lectura demasiado corta, no lo volvería a leer. No lo recomiendo.

Heather Wiese says

Pretty short story, according to my Kindle it was actually over at like 65% and the rest of the book were the first chapters of other books by the author. That annoyed me.

This one is about Kegar, a Phantom Warrior who takes the shape of a saber-tooth tiger. He apparently sneaks off the ship to find his mate, although that's all the info you're given (soooo...why did he feel the need to do this?), and he is trying to find her before the ship finds him and hauls his rump back. He, again for some unknown reason, goes to La Brea Tar Pits. WHAT?! At least in the other books the guys go to some out of the way place that calls to their animal souls...but seriously, in a L.A. tourist trap Kegar? Really? WTF?

Anywho, he goes there. He gets seen by tourists and the media is all over it. Because you know, saber-tooth tigers haven't EXISTED for 11,000 years-ish. Of course it causes a ruckus. That's when Katy is called in, a tracker for a bio-tech firm. Once again, bio-tech; the big-bad. If the news reports are real Katy's boss (who's an ass) wants to run testing on the animal. Thinking it's a big hoax, she goes out there and to her surprise, finds him.

He speaks to her telepathically, she thinks she is hearing things and tranqs him. When she gets him back to her place (she wants to make sure he is real before bringing him into work) she finds a naked dude in the cage instead of the tiger. Oops.

Kegar is all about claiming her as his mate, he throws off some pheromones that convince Katy, mating happens. Then it's a very short hop to the ship and it's the end of the story. Too short!

Samantha Woods says

Katy's boss is always sending her on wild goose chases. He also happens to be her ex. She is tired but what is she to do? She needs the job and won't give him the satisfaction of him making her quit. When she gets a call to retrieve a Saber-tooth tiger she is doubtful that is what it is. They are extinct. Little does she know that when she gets to the Tar Pit that is exactly what she will find.

Kegar snuck off the ship. He knew he shouldn't but he is excited about the prospect of finding his mate. He really knows he shouldn't have shifted. That was made clear when a woman shoots him in the leg with a Tranq gun. Next thing he knows he wakes up naked with his mate bending over him. He doesn't have a lot of time. So he has to make sure that she is his mate and get her to agree to leave with him within a couple of hours.

This was a great book! I thought that the author put yet another unique spin in her book. Not only is he an alien/shifter. His other form is a Saber-tooth Tiger. While it is a short story it flowed really well. You are able to like Katy and Kegar's characters and really dislike the ex. I look forward to reading more from this author.

Pretty good book, though be aware it is on the shorter side. Still, enjoyable and the fate of Roger was funny.
