You know how people always say-even the hypocrites-don't judge a book by its cover? In this case, people. Well that same rule applies to Ellie Burke when she meets the most interesting and mysterious boy she's ever encountered since moving back from her old town. So, she did the only thing that no one has ever done since this boy became the blind freak, and talked to him. And it was probably the best thing she ever did. This story is probably one of the most touching and interesting books I have ever read. Only because it tells the real meaning of true love in its own unique way. Read The Boy Who Lost His Sight and join Ellie and Riley's complicated ride to finding their way to each others hearts.

Give it a try.

first of all, seriously dear writer. i give my thumbs up because i think your writing is absolutely good. i mean for a malay and malaysian girl to write in a simple yet interesting way is really an achievement. which i envy.

second, for the storyline..i guess i can know what your age are. the story is good but somehow it is lack of maturity. at first i think this story happen in our society, in our country but it turns out that the settings is in florida. wow.

maybe for a teenage girls, students feels that this story is an interesting one. cute boy with flaw and cold character. ordinary girl with bad past time but positive and cheerful. it seems like the typical hollywood high school story with no drugs or sex.but it is lack of ... i dont know. it feel like something could be discuss more in detail. for example we can know how well john green can write a teenage story but there is still an issue that we might find simple but had deep meaning.

so yes i think you will understand it as you grow up. a good story does not mean that it has to be a serious and complicated but it is much meaningful if it is something that relate to you & the readers.

you really had the potential bella zambri. keep up the good work.

p.s: i just read your biodata. no wonder, you write it when you you're sixteen. god, your english must be flawless at such young age.

First of all, I was so excited to read this book and the reviews plus the views on wattpad was so high! It got me all pumped up to read this cute little book. It also has such a great blurb at the back of the book. Everything seems so good and tbh, this book did not disappoint me entirely but it went a little downhill for me as it didn't hit that high expectation I set in the first place.

Being the first full Malaysian English novel that I read, it was not bad at all. I enjoyed reading it. The Boy Who Lost His Sight had such a pleasant story line, it was eventful, the idea was there. But somehow there were a few things that I didn't enjoy that much.

First, THIS BOOK WAS ABSOLUTELY SCREAMING 'CLICHE' at my face the entire time. Cliche usually works on me. I like cliche love story. But this one somehow didn't work that much because I was expecting some kind of plot twist, but there was none! Everything was almost too easy to be predicted. Upsetting? A little. The story created was perfect but I just hope that there was something done to it that could spice up the story a little.

Next, the pace of the story was a little bit too fast for me, that it sometimes didn't make much sense. I hoped that things could be stretched a little longer, that maybe there were some kind of appropriate 'fillers' could be inserted in between some of important parts in the book. For instance, I think Riley fell in love a little too fast with Emily and Riley received her help a little too easy without much justification to why he really felt so good about her.

Then, Riley's character. Riley for me was a little confusing in the first part of the book, but later on, after he dated Emily, he got a little better and came up stronger with a new personality and character, which was good. Comparing to the first part of the book, I thought he was supposed to be this cold and stubborn and just quiet kind of guy, almost like Edward Cullen. But once he spoke his lines, he was talking too much and didn't go well with his character. So that was why I was confused.

I guess those were the 3 main points of the things I didn't like much about the book. Overall, I did have a nice time reading The Boy Who Lost His Sight. The writing style was reader friendly, it had some nice simple quotes(even though they didn't give a deep impact to me) and it is a book that you can read anywhere, at any time. So, to whoever loves some cliche love story, go grab this cute one here! ;)
