What would the world be like if 80 percent of the population manifested superpowers called “Quirks”? Heroes and villains would be battling it out everywhere! Being a hero would mean learning to use your power, but where would you go to study? The Hero Academy of course! But what would you do if you were one of the 20 percent who were born Quirkless?

The U.A. High sports festival is a chance for the budding heroes to show their stuff and find a superhero mentor. The students have already struggled through a grueling preliminary round, but now they have to team up to prove they’re capable of moving on to the next stage. The whole country is watching, and so are the shadowy forces that attacked the academy...

## From Reader Review My Hero Academia, Vol. 4 for online ebook

### **Nicola Mansfield says**

A great volume action-packed with battles but also gives us great insight into a lot of characters. The book starts off with a team challenge where the contestants divide themselves into teams of four and play until four teams have captured all the points. Then the rest of the book does one-on-one battles with the remaining sixteen players ending before the final battle. While the main character is developing and gaining in his powers it is the close look at all the various side characters which really makes this volume shine. My favourite of the series so far!

Nothing like a pointless school competition to get me into a shonen manga.

The first 1/3 of the book was about the strange Joust-like tournament round. This was one of the weirdest games I have ever seen! Then the finalists go into the next round of one on one battles. We get to see a lot more quirks. Some interesting, others are just plain odd.

The where several scenes that were not easy to follow. Too much action to understand properly. The panels also jump around a lot between characters on the field. Does not help. Probably looks great in anime form but paper images are a bit trickier to follow.

I really liked getting a bit more in depth with some characters backgrounds and personalities

So good. Can't stop won't stop.

This volume made a bigger impression on me. The relationship between “hot and cold” and his father is frustrating and moving in its way, even if it isn’t extremely developed yet. His father, though the second most popular “hero” in the superhero community, should be counted among the villains for what he did.

This issue also has a tournament (a must for battle manga). The fights were not very memorable so far, though.

I feel like I've never wanted the next book in a series as badly as I want Volume 5 of My Hero Academia.

This was some good shit, boys. Just like this series always is. I know it's already pretty fast that they come out every few months, but I feel like it could be even faster. Like does it really take that long to translate and touch-up and all that? I kind of feel like I'm talking like an ungrateful brat right now, so I'll stop.

This whole volume (which consists of chapters 27-35) still just covers the Sport Festival arc, and it's still going strong by the end of chapter 35. It also ends on a mighty cliffhanger, so thank you very much to whoever decided to end the volume there. This arc is pretty good, we get to see the millions of characters in action which is pretty cool. I love Aizawa Sensei, just gonna casually drop that here. We don't see him in action during this volume (that was the last arc) but he's one of the commentators to the festival. I feel like watching him in the anime and reliving him from the earlier chapters is what has got me so keen on him now.

I started reading this late at night on the Sunday that episode nine of the anime aired. That's the episode where it's the start of their third training, Rescue Training. Would that be the Rescue Training arc then? Or something else to do with villains, since that's the first time they fight villains. Who knows, either way that's where the anime is as of the writing of this review. The fifth episode aired a couple days before this volume was released, so I was a little behind on picking this up.

I want the next volume now please, thanks. And no I will not read any fan-translations online. I want to support this amazing series with my money, and you should too! Wheee!

In the great tradition of other shonen mangas like Dragon Ball, the tournament that started in the previous volume takes up the entirety of this follow-up book as well, and it seems far from over. It's also very entertaining! We find out even more about the characters, and their development is actually pretty impressive. Also, I have to mention that Ochako Uraraka not only has the best name ever, but is hands down my favorite character in this manga, and one of the coolest female characters I've ever encountered in any Japanese media. That cliffhanger finale makes me want to pick up the next book immediately. And yeah, obviously, by this point I'm totally into *My Hero Academia*.

Oh my god ???? This was so good.

We're into tournament battles now! I'm glad Horikoshi-sensei keeps them short and to the point. Too often shounen series that have battle tournaments drag things on waaaay too long.

These ones are interesting, too, since they're all with quirks. It reminds me a bit of MAR's battles later in the series, with all the crazy weapons and magic.

Anime nya lebih seru. Salah sendiri nonton dulu. Haha

**Daniel says**

Not much to say here. The plot is moving... but sloooowly. Still the art is nice and getting better.

### **Maria says**

Amazing!!! The sports festival allows us to get to know new characters and learn more about everyone's personalities and quirks. I'm happy to see how friendly and supportive the characters are being towards their classmates/teammates.

P.S. Shoto Todoroki is quickly becoming one of my favorites. Such complex character with a tragic background.

P.S.S. Do not underestimate Fumikage Tokoyami, kids ??

No, but really. I love these characters so much! This one really showcased how they can be friends and still maintain healthy relationships when competing against each other. \*runs off to read volume 5\*
