The Fatal Cache

Cheryl Kennedy

The Fatal Cache Cheryl Kennedy

We've all experienced the thrill of hiding, the terror of being found. But what if no one's searching? What if no one knows you've hidden? What if you've hidden so well that you can't be found? Or better yet... what if they abandon the hunt altogether? When a popular geo-cache blogger fails to return from a weekend hike in the rural town of Birch Meadows, New Hampshire, it's up to the county sheriff and his less than enthusiastic deputy son to find the young woman before the plunging New England temperatures cover any evidence of her trail with snow.

Kristen says

I received this book from the Goodreads Giveaways. Although murder mysteries are not usually my thing, I had to give this one a shot because it features one of my favorite hobbies, Geocaching!

This was a well written book, with great characters and a smooth flowing story line. Murder mystery fans and geocachers should definitely give this one a try.
