From Reader Review Ghosts for online ebook

Karen says

Strange to read a non-fiction book about ghosts! Especially for a 3 year old that has not had time to form opinions about ghosts.

It basically shares a lot of stories about ghosts, and what people commonly recognize as signs of ghosts. It does not state conclusively that there are or are not ghosts, but leaves that up to your own thinking.

Well done I would say for the audience it is written for.

Sydney says

people use nightlights because they are afraid of ghosts.

Angela says

Well, I say that this book is great for telling me what people thought of Ghosts. Steve told me a little about this book after he read it. He said that the White house is haunted. I enjoyed learning about ghosts and reading some of the ghost stories they told. I really liked it. It was awsome. Great!

Rhonda Fazio says

!!!!!! I love Magic Treehouse! Some are things I love to know about! :D!

Mas5thgrade2011 says

kinda scary

Charissa says

A fun read!

Gabby says

It's safe to say that I like the research guides 10x better than the actual books.

Melissa Maillet says

What an interesting read with my children! I've never seen a children's book of ghost stories presented in a non-fiction format before. Exploring the lore of ghost stories around the world was very exciting for the kids and we added locations on our ever-growing list of places we would love to explore. Even if you are not following the Magic Tree House series with your kids, this book is worth picking up. It stands strong on its own.

Andrea Labonte says

Awesome book.

Dolly says

This is an interesting non-fiction book for children about ghosts and a few areas around the world which are purported to be haunted. The narrative does not make claims about the actual existence of ghosts, but tells about ghost sightings and the scientific rationalizations that might explain the appearances. We've read all of the books in the Magic Tree House series thus far and now we are catching up with the Research Guides. We've read several of them, but have many more to read.

Michael says

It is always great to get a kid hooked on a series, but so much better to hook them on a series that has both fiction and nonfiction books. We don't give nonfiction enough credit, nor do we honor the fact that so many boys want to connect their reading with real life. Well, in this case it is real death in the form of real ghost stories, highly illustrated and quickly told. Great for those kids already addicted to the series, and a grand introduction for those who aren't.

May Regan says

Pretty sure this is still at my house. I think it's been there since 3rd grade, at LEAST. But anyway. I was that nerd who not only read and understood all the historical events that happened in the original books, but also went and read the RESEARCH GUIDES and other books that covered the same subjects so that I could go back and read the books **just to point out the historical inaccuracies**. I was THAT kid. (Gosh I must've been annoying as a little kid.... I'm sorry Ms. Sarah!)

Emily says

this is very interesting. in some parts it gets really scary but in others it is very odd and funny.

Christina says

My 9 year old enjoys the magic tree house series both the stories and non-fiction companions. However, he had trouble feeling engaged in this one (as did I).

Cora says

Picked up my daughters book and just started reading it. It was pretty good. Little tidbits of history that make you think. Are there ghosts out there or just wise tales...what do you believe?
