"He believes you upset the balance of the pack. Your presence causes trouble no matter what your motives are." Sadie hates proving the Alpha right.

Wolves distrust Mages and their ability to manipulate mind. Sadie is Mage and mated to Billie, Beta of the local Wolf Pack. She's proven her loyalty to the Alpha, but an injured Wolf from a neighboring pack brings danger from without as others learn about the Mage living with Wolves.

In the midst of it all, Sadie must come to terms with a prophecy about her and endeavor to fulfill it. Her actions will determine the fate of every race.

## Mandy says

This is a great continuation of the Psyche Moon series. I was sucked right back in and eagerly waiting for the next! I can't wait to see what new twists and turns she will bring us.

If you haven't read the previous two books, then go and read it. This is unlikely a standalone.

I felt the hatred and distrust toward Sadie to be somehow a little over-reacted, knowing that if she really wanted to harm them, she would do it by now. I understand that it is nerve-wrecking to be near someone who could control your mind without much effort.

For example, if I am roommate with a serial killer, I'm not allow to change room, not allow to step outside, I would act the same way as the wolves every night I sleep in that same room with said killer.

What I want to say is, at one point, I wouldn't careless anymore. Because I can't do anything, can't fight it, can't escape it, and that serial killer want my trust. The truth is, if the killer really don't want to harm me, they wouldn't, if they want to, whether I trust the killer or not, it doesn't make any differences. So there's no point for me to be paranoid (but I doubt in real life, it is hard to stay calm when something could kill/ control you at any moment, whether you realize your effort is futile or not)

But then, I'm glad that the wolves' treatment toward Sadie did improved a whole lot at the end.

(view spoiler)

I actually like the first two books better, I think most of it had something to do with the romance between Sadie and Billie. In the third book, the romance dropped drastically, other than Sadie and Billie connection through mindspeech, their comfort words toward each other, a little bit of their intimate moments, I didn't feel it as much as the first or second.

Other than those minor criticism above, I think the book is very great. The whole series is great, especially the concept and plotline. This is the first time I read three books within two days. I never notice how much of a bookworm I am until now. I definitely looking forward to the fourth one.

## Arien says

Psyche Shield failed to hold my interest. I somehow stomached through the second book but it's as far as I can get with all the pacing issues as well as plot holes. The author often tells and repeats the same thing but barely shows them in action, secondary characters are introduced but barely ever, if ever brought up again, backstory is teased but never uncovered or elaborated, important plot points introduced and forgotten with no relevance to the story as a whole. On top of all that the sex scenes are uninspired and a chore to get through

and there's quite a lot of those in these books.

I fail to see why these books are so highly rated. They don't do anything original, nor they do it better than others. It's as generic as it gets.

More one amazing book from this series.

Waiting for the next :)
