Another great series by Wilbur Smith.

The first book, River God, is set in ancient Egypt and is the story of the Pharaoh's slave, Taita and his devotion to the queen. The book sets up the next one which is set in more modern times and is the story of two treasure hunters looking for the treasure that Taita hid during his adventures. The third returns to Ancient Egypt and tells the story of Taita after the death of his beloved queen.

This series is different from the rest of Smith's books, which are mostly set in South Africa.

River God was one of my favourite books. Catching a glimpse into the Egyptian mindset is eye-opening. Wilber Smith does a lot of research into his scenarios, and the plot feels plausible, along with the emotions ascribed to the characters. Seventh Scroll was rather weak in comparison, but a good tag-along to follow the story-stream.

River God is great fun, as is Warlock. And the hero gets the girl in the very end, but it is hastily done. and is not as satisfying as the first hero getting the girl. The Seventh Scroll is not a fiver, but Smith throws enough of Taita in to keep one's interest up. Good to read if you like ancient Egypt, especially if you like braggart but endearing narrators.
