### **Bronwyn says**

This is such a cute little book. The poem is really charming and I love the touchable parts on each page!

---

### **Heather Rainwater-Alvarado says**

We purchased this book for my 10 month old daughter and she is obsessed with the textures on the pages of this book, and especially the cover. The story has a great rhyme to it, but the textures really sell the book to toddlers. I'm looking forward to enjoying this book with my daughter for years to come.

---

### **Petra says**

This book is great. The illustrations are super cute, the story is fun and the tactile pieces provide a different sensory experience for kids than other sensory books. My 2 month old loves it and gets a kick out of the noise that the spines on the front of the book make when I run my fingers on it.

---

### **Troy says**

An intellectual masterpiece.

---

### **Cherokee Crum says**

My kids and I love this little book.  
Its filled with beautiful and bright illustrations and easy rhymes.  
My toddler loves the colors and the textures.

---

### **Jon(athan) Nakapalau says**

A tactile book that knows you will do what it is telling you not to do! The pieces of rubber (dinosaur skin) on the illustrations will be a big hit with small children.

---

### **Alisha says**

A cute touchy feels book to read for my son's reading time.

---

### **Erin says**

My four year old got this for his birthday and we've read it several times. We like the bits on the pages that we can touch...yes, even me. The story is super cute and I love the art. I do wish there was just a bit more to the story but there are a lot of days that I really appreciate the brevity.

---

### **H says**

With the recent spate of *Jurassic World* books, where are the new dinosaur books for the little ones? Here!

*Never Touch a Dinosaur!* is a touch-and-feel book that is different than the norm. Instead of the usual sandpaper, sisal weave, and fluffiness, these dinosaurs are all nubbly! The dinosaurs have differently textured rubber spikes and stripes. It would be a rather good change of pace for those younglings that like to touch what they are reading (perhaps, especially those with sensory needs). But remember, *never touch a dinosaur!* They might try to eat you!
