Bridget LeClair was only a housemaid so when she died, no one paid very much attention – not, that is, until Thomas Jefferson was accused of killing her. Jefferson had secrets worth killing for, to be sure – his affair with his slave Sally Hemmings and his role (if the rumors were true) in Senator Blount's treasonous conspiracy. He wasn't the only one with dangerous secrets to hide, however. Poor Bridget was a magnet for scandal.

Senator Jacob Martin most reluctantly becomes involved, along with the Senate Doorman James Mathers, in trying to discover who really killed her. It is a task that wins him no friends, as he must unearth the scandals of some of the richest and most powerful men in the country. The political cost is bad enough, but the damage to his budding relationship with Elizabeth Powel is disastrous.

Secrets Worth Killing For, takes you back to the precarious early years of the United States, a time when powerful enemies without and bitter conflicts within threatened the survival of the fragile young nation.

"a terrific historical mystery" - The BookLife Prize in Fiction

I received the book for free through Goodreads Giveaways.

I enjoyed this book. I did not read the first book in the series, but this one can be read as a stand alone book. I liked James Mathers character. He was smart and resourceful. I'm not certain how I feel about Senator Martin-he seems quite intelligent, but wanted to not get involved. I liked reading about the life at the time of the book-what it was like for women, immigrants, etc. It was a nice little mystery, but left questions at the end of the book.

Nice book to read.
