Great series, was sad when it ended. Well developed characters and quick read.

I Love a mystery where I'm completely clueless until the big reveal! This was the case with this delightful entry in the Lauren Laurano series. I adore Lauren and Kip, but things are not easy for them, or their friends, in this one. I can't believe I'm 20 years behind in reading these wonderful mysteries by Sandra Scoppettone!

I'm waiting on a couple of books from the library - so decided to reread this delightful series (read them 10-15 years ago). I love the characters and story - not great literature but a solid light/quick read. A bit heavy handed in the gay/feminist departments (but maybe a little dated that way because I don't recall thinking that when I read it the first time). The main character is a smart, quirky PI who lives in Greenwich Village (with her partner - who's a therapist :) ) and spends nearly as much time deciding where to have dessert as solving the crime. As enjoyable the second time around as the first.

Sandra Scoppettone yet again keeps up with the witty and funny sense of humour yet shows the sadness of Lauren Laurano after the loss of her dear friend. Mrs Scoppettone never fails to surprise and entertain her audience, she is simply a brilliant writer.

A mystery, all about shifting perceptions. Even more than *Everything You Have is Mine*, a good reminder of why I enjoyed these so much the first time around.
