The world changed for Lillian Michaels the day Marcus chose her. Gorgeous, strong fierce...and soon he would be alpha of her werewolf pack. But then the marriage was set. No choice. No looking back. Except, she did. Lillian started looking forward, too, and wondering if eighteen was too young to give away her life.

Certainly, it is tonight. A rock concert. She and her friend, intoxicating music, sweat, bodies, freedom...and him: Paul. The human bassist's touch makes her soul sing like the strings of his axe, and everything is possible. Yet, Lillian's parents, her secrets, her entire world lies elsewhere. Paul doesn't even see what she is, what she can do. What she must do. This to-die-for human is not of her kind. And yet, something special, something terrifyingly perfect, something eternally true has been...born of lies.

### Liv's Love Book Blog says

Didn't realize this book was so short lol, maybe I should've checked before I started reading.

This book is a short story just explaining how Lillian and Paul had met. It was a super quick, cute read and I'm happy to have read it before I started the series because it was nice to read how Aiden and Allison's parents had met all those years ago.

My only problem with this novel is that it didn't stay consistent with what Lillian and Paul had said in the first book of the series(book 1, not this book this one is .5). I think it is because this book was written later and not the first published book in the series and she just must've forgotten what she had said when she wrote this book. But still it bothered me when I read this book first and then read the first book of the series right after because everything was still fresh in my mind.

I can't find the exact quotes but the part that didn't line up was how Lillian came out to Paul that she was a werewolf. In this book she was crying and Paul had to practically beg her to tell her what's wrong while in the first book they said that they were hanging out in Paul's dorm (which was weird because he had lived in an apartment) and she just blurted it out.

Other than that this book was cute and I liked having an insight of how the parents met because usually books don't do that and I loved how she did!

Since the day Lillian Michaels had become Marcus's future mate, everything had shifted. Lillian wanted to be loved and cherished, but Marcus was preparing to be Alpha and although he cared for Lillian he didn't feel the need to wine and dine his mate.

When Lillian heads for a rock concert though everything changes. She meets Paul, he is her soul mate. As her world begins to shift, Lillian has a difficult choice to make follow the path her pack has set for her or follow her heart.

This is a prequel that sets the stage for the rest of the Red Ridge Pack series. It all began with Lillian and the choices she made years ago begin to unfold in future books

I have to say i loved this book - well novella!

I hadnt read any of the Red Ridge stories yet, so i know this is a prequel to the very first book, im hoping i havent ruined it for the rest of the series when i finally get around to reading them.

It brings us to when Lily and Marcus were teenagers and having fun, but then Marcus was lined up to be the

packs Alpha (sorry- werewolves!). Lily stands by him but feels a big distance between them until she puts 2 and 3 together and gets 4 and realises hes seeing another girl.

But she cant just finish it. Pack laws have made it that Marcus and Lily WILL be married, love or not....which is a little sad to read - its so clear that neither want to be together.

Lily goes to the local fair with a friend who scoots off as soon as she spots a "hottie" leaving Lily alone and wandering aroud by herself.

She sits next to a stage while a band warms up to play and finding herself enjoying the music she moves so she can see them....and in particular a certain guitarist/singer....who spots her right back.

Lily and Paul start to talk, and things develop.....

But Lily is betrothed to Marcus.

Shes a werewolf - something that should never be revealed to humans.

And shes in love with paul.....and miserable.

something needs to happen.

Something needs to help Lily be happy - and in the knock on process...make Marcus happy too.

Great read, im now on the lookout for the rest of the books which i hope i can find! Want to read about the red ridge pack!

I liked this book. Marcus was clearly such a jerk that I clearly understood why Lilian would fall for Paul and choose him over Marcus. I didn't quite see the need to make her parents seem so uncaring especially her mother. I also find the idea that 18-year old boys are going to become the alphas of a pack and somehow depose their parents by virtue of turning 18, very hard to swallow. Other than those things, it was a good story.

Lillian Michaels was dreading her prearrange marriage to Marcus Walker, the future alpha of the Red Ridge Pack. Once in love their relationship turned sour. Now neither one could stand the other but are bound to an arrangement made by their parents.

To get her mind off her dreaded future Lillian decided to attend Red Ridge's first Music Festival. Little did she know she would meet human Paul Wright, a sexy rock star performing at the concert. The two have instant chemistry, but she is promised to another.

Born of Lies is an emotional story that will captivate its reader. Lillian's story is well told and moving.

This is the first book I read by Sara Dailey and Staci Weber. The two make a dynamic story. I really enjoyed

this prequel and will definitely continue reading the other books in the Red Ridge Pack Series.

Can the power of love triumph over pack rules and family obligations? Will young love stand the test of time, the revelations of hard truths? For Lillian, love with Marcus, the future alpha of the pack seemed natural, normal and was her dream-come-true. Then they grew up and apart, yet still forced to abide by the arrangements that had been made. But who would think a gorgeous rock band member would catch her eye and her heart, especially because he is human and she is a werewolf. Her heart belongs to Paul, but it would seem their love is doomed. The pressure is on for Lillian to obey the ways of the pack, but what about what she wants or what she NEEDS?

**Born of Lies** by Sara Dailey & Staci Weber packs a lot of emotion, and shows great main character strength in a story with fewer than 100 pages. From start to finish, the tension never quits in this well-told tale! An entire story is laid out, colored in and never once did it feel rushed as it focused on one main character, using the rest in well-planned supporting roles.

I received a review copy as part of a Virtual Tour for Born of Lies and the Red Ridge Pack Series, which is definitely on my radar now!

Lillian is 18 and engaged to be married to Marcus future Pack Alpha. They have been dating for 2 years and their love was all that love should be. Slowly their love heads south. Lillian is the only one who wants to take about it and get things back on track. Marcus tells her to deal with it.

Lillian sneaks out and meets a band member who knocks her socks off! But can she , will she follow her heart or be forced to marry?

I loved this book!!! Having read the others in this series, this was a great way to see who what and why. I highly recommend this book you will not be disappointed.

### **Jonel Boyko says**

This is the perfect prequel to the red ridge pack series. Although not strictly necessary for the series as a whole it gives a great deal of the why & how of the current pack structure. The authors use the same approachable and enticing writing style that we've come to appreciate from these authors to tell this bittersweet tale.

I appreciate how we get to know some of the pack parents much better in this novella. The main players become quite well developed. You get a real understanding as to why they did what they did & how they become who they are today.

My overall thoughts? Holy \*#&@, just holy \*#&@. What a way to start out, but I'm so proud of Lilly. With this novella you'll fall in love with Red Ridge & with the adults of the pack all over again.

Please note that I received this novel free of charge from the author in exchange for an honest review.

### **Tala says**

Born of Lies is a prequel to the Red Ridge Pack series. At 90 pages it doesn't take long to read and makes this review difficult to write without spoiling. I was hooked from the beginning and didn't put it down until I was done. It's a well written emotional read with just the right amount of tension throughout. The characters were surprisingly developed for a novella and it flowed nicely. It never felt rushed like you get with some shorter stories.

I definitely recommend this to those who have read the series for a well done back story. I also recommend this as a good series for anyone else. I for one haven't read the rest of the series and will be getting the next book soon.
