Being a vampire means that you don't play with your food. It can be a lonely existence, particularly if you're struggling with remnants of your humanity. And what about love? Rick Allstedt finds himself falling for the unexpected - a human who knows about vampires.

Set in the darkness of New York new wave/punk scene of the 1980s Rick is confounded by his existence amongst humans. For years he had viewed them as nothing but sustenance, but one woman will change that. Will he find his purpose when he finds Serenity?
