House of Leights Jaymin Eve

Maya has never had much to complain about. Sure, her parents are absent a lot, having important jobs in the government, but at the end of the day she has all the material possessions a girl could want. Not to mention a great best friend, and secure spot in the popular group at her school.

Yet she can never shake the feeling of displacement. Constantly searching for something that's missing from her life.

Turns out Maya is part of something much bigger than her human existence, and after a mysterious stranger saves her from an ambush at a party, he brings her into his world.

And turns her world completely upside down.

This series continues to be incredibly innovative. It's a rare mixture of fantasy and perhaps a little scifi. In each book the characters are credible and likeable keeping the series beating along at a good pace and a strong story arc. I am looking forward to the fourth book which should finish up the series.

I had lost a bit of interest in this series after book 2 but picked this book up as in need of a book 3. I am glad I did as this book was almost as good as the first one. I immediately liked main character Maya and found myself invested in her story quite quickly. I liked that her story was slightly different from that of the other two so far. I am now looking forward to picking up book 4 and the conclusion to the series

This has been my favourite in the series so far. The first two basically centre around a couple, whereas this one has secondary focuses on the group as well, and it just makes the story more balanced. The insta-love has been explained by the previous couples' actions, so it's more believable in this instance. Plus, tree form. And a protective best friend along for the ride. There was a lot of fun and action leading up to the final book, hopefully we'll see a few big twists before it ends.

This was the worst book so far for me. I was really excited to see Chase be the main character, and Maya was a good lead, but the book was just boring. It's the same formula as the first two, which makes it really predictable. I'm sick of listening to explanations over and over again. Nothing really happened in this book and it was way too short. I'm also really sick of the whole couple thing and the soulmate "insta" love. Hopefully Xander's book shakes things up.

Ok so I wanted to give this 5 stars really bad. Because it's Jaymin Eve and all of her books are pretty much amazing. BUT....Well there were two major problems with this book and this series overall.

1. The girls are incredibly immature. We could make the argument that they're young but some things are just ridiculous. At one point Maya and the gang have minutes to leave a location because they've been discovered. She takes time to put on makeup! Death is on the line and she stops to pick out a cute impractical

outfit and matching blush?! Come on! Really???!!! She never seems to grasp the danger they're in because she's constantly worried about trivial things.

2. I was very excited to see a book that has a multicultural element. Every heroine and hero being white gets boring after awhile. However Eve unfortunately used every single multicultural trope that exists in writing these characters. Maya's mother is a tiny 'traditional' Asian woman. And per every Asian character Maya herself has the colored streak in her hair to signify her 'rebellious' nature. Think every Asian female character you seen in mainstream film or tv. That's Maya. Even Emma suffers from this. One black parent but other than thicker hair or naturally more tan she displays no other real connection with being biracial. I had hoped against hope this series would include a female lead that was black. Not for political reasons but because it's always nice to see a character that looks like you when reading books. Also it could have been used to to explore the cultural differences between the houses in comparison to racial differences on earth. Instead it's slightly alluded to without delving deeper. Fleshing these characters out more would have helped and not harmed. As it stands they have little to them besides being athletic, a bookworm and spoiled. I KNOW Eve is capital of building a complex and believable fantasy world but these ridiculous tropes get in the way of it in this series.

That said I'm definitely ready for the last book. The story is riveting and original. I'm more that ready for the villain to get his. House of Royal seems poised to be explosive. I just hope the heroines can get their act together and stop acting like indignant children whenever their men get so much as a scratch.

This is a great series

I can't wait for the next book. I love everything about this series. The characters are diverse, sexy, smart, and strong. The storyline is fascinating. I love all the twists and turns. The world building is incredible. I found this series by being a member of goodreads. I am grateful for all the people there who share a passion for reading.

Book 3 or book 1? This series has very similar storylines for all three books. First book loved, second book was a bit repetitive but thought it was still good, and now book three is along the same lines as the first two.

Book starts with the lead character/secret keeper is danger. Her secret keeper mate comes and rescues her from bad guy. Secret keeper and boy falls in love in two minutes. Guys says not to rush it.. they indeed rush it. Bad guys gets angry and retaliates while bursting the love bubble. Something bad happens. Good guys get away. Find next secret keeper. Book ends.

But seriously, the series started out great but damn some of these lines were almost the exact same from the previous two books. Don't get me wrong, the book is still good but I could go for some variety. I've also noticed between her other series, they have very very similar stories lines as well. This will be the last series I read by her. She's a great writer but the story is played out now.

It's hard to pick a favorite in a series when each story, and each couple for that matter, is so freaking awesome!

September is too far. I want, no, I **need** House Royale's story now.

While I didn't care for this story as much as book two, Maya was a great character. If you liked the first two books you'll enjoy this one. And I really can't wait for the next book.

Gods this book is simply amazing! I cannot wait for the next and see what happens!

This series just keeps pulling me in deeper and deeper. You think you've found your favorite couple, only to realize you love the next one a little bit more than the last. Or maybe you love them all equally, just

differently. For me, I seem to connect to each girl in some way, relate to them. As far as the guys, I just love them all! What girl has never fantasized about finding her soul mate, her bonded mate? I know I have, all my life. I find that I lose myself with in the pages of these books. I've said it before and I'll say it again, Jaymin has a way of sucking you into the world's she creates in her books. I could lose myself in her words, forever. Each and every book in this series has left me wanting more, left me needing to know what happens next, chomping at the bit for one more page. I've also said this before, but it's so true, her books are an addiction! I am in dire need of the next book, House of Royale.

House of Leights is book 3 in the secret keepers series. The story continues on from book 2 but from Maya's POV I really like how this series has been written, Each new book in the series adds to story with great new characters and relationships growing and evolving. I can't wait for the final book in the series. Hoping for a Brad and Star spinoff. :)

The third sequel in The Secret Keepers series follows Chase and Maya on the quest to find the fourth secret keeper.

It really only got exciting for me when the Royales figure out that the girl is somewhere on the island of Lanai in Hawaii.

The descriptions of the island and people were spot on, and I'm thrilled that there could be aliens living there! Haha.

The next sequel concludes the series.
