**I'm Big!** Kate McMullan , Jim McMullan (Illustrator)

From Kate and Jim McMullan, the popular creators of *I Stink!* and *I'm Dirty!*—now a streaming animated series—comes a hilarious new picture book about one BIG dino who's just trying to find his herd again.

He's BIG, a whole lotta lizard-thunder comin' at you! But he's also...lost. Have you seen his herd? BOOM, BOOM! Uh, oh! Help this sorry sauropod find his pals before he becomes lunch for some hungry predator. Yikes!

# From Reader Review I'm Big! for online ebook

## Liam says

This children's book doesn't even have full sentences in proper English. Actually, my four and two year old might already speak better English than this book contains.

---

## Dee says

The grammar was terrible and the "dinosaurs" stuff could have been so much better or educational.

---

## Miranda Middleton says

Some Notes:

- Onomatopoeia
- Different colored text to indicate/distinguish character
- Text interacts with pictures
- Consistent plot and story line
- Introduces a couple types of dinosaurs
- Great for audience interaction because of the richness in sound

I would use this:

- to introduce onomatopoeia
- to introduce a unit involving prehistoric creatures

moral: Being big is not bad. Every body has their own type of "superhero strength." You were made the way you are for a reason.

---

## Matthew says

This is a sort of continuation on the series that includes I Stink! and I'm Dirty!, but it's also a departure in that it is about dinosaurs, another big draw for kids in the target age group. I like the book, though I feel like kids of a certain age might like it more than I did.

---

## Heather Jo says

megan winter reading 2017, children's book, picture book, series, dinosaurs, size, prek, kindergarten, first grade, second grade

---

### **Claudia says**

This book is a narrative of a dinosaur's journey to find his herd. Students can learn about writing stories from their point of view. Also students can use this book in social studies as they learn about maps and using a compass. This talks about dinosaurs, so there are MANY ways to use this in any lesson!

---

### **Weisser says**

A great book for students about responsibilities, being self aware, and sure of one's self. Also wonderful it you just like dinosaurs.

---

### **Eliot Reads says**

A sauropod that overslept uses his size to help find his family, that left without him?!

---

### **MsRosas says**

2.5 stars. Kids might like it more.

---

### **Matt says**

How else would you describe a dinosaur? When he loses his pack, this dino must search for them. He comes across some carnivores, but uses his size to spook them off. A little intuition and he is back on track. Neo asked if we could see some dinosaurs, which would allow us to determine their size. Museum and Calgary Zoo, here we come!

---

### **Jon(athan) Nakapalau says**

Don't oversleep if your a dinosaur...you may find that it is hard to find the rest of your group when other dinosaurs want you to join them for breakfast - as THEIR breakfast!

---

### **Terry says**

My sons picked this book, and they loved it! They are into dinosaurs. It was short so it kept their attention well. There are also LOTS of fun words like BOOM BOOM BOOM (as he chases the predators away) and GA-LUMP, GA-LUMP as he tries to run away. Filled with action and humor, this is a fun story.

Parent thoughts:

I liked the book somewhat. The story is fun; and the action words are exciting and fun to read to little kids, especially if you like using character voices. However, I was a bit underwhelmed by the maturity of the text. The author pushes the text to slang and made-up words more than I like. The illustrations, while effective, are not anything to write home about. Again, they work with the story, and are colorful and fun. One thing I **did** like about the book is that it encourages problem-solving: the sauropod has to figure out how to get away from the predators, and the text engages the child to respond to the situation by asking questions. It encourages the child to also explain why different solutions are not going to work, and uses size and shape in the problems. For those looking for dino books packed with scientific factoids, you won't find a whole lot here. The dino theme is just that, and the illustrations and text do not embellish or stay detail-true to dino study.

## **Hailey Forbes says**

Genre: modern fantasy

Reading Level: elementary

This book is about a dinosaur who gets separated from their herd. The book takes us on an adventure to find the herd and has some problem solution situations. This is good for a young reader.

---

## **Michelle says**

This is the first book in this series that I have actually liked. Kids who love dinosaurs will adore it.

---

## **Rosa says**

The reader gets to follow a sauropod while he looks for his herd, that left w/o him when he over slept. You get to meet other dinosaurs and find out how he eventually finds everyone.

The rhyming text is fun and there are some semi scary moments. The illustrations are colorful and fun.
