We actually started with one of the later books. (The name escapes me at the moment.) My son really enjoyed the quick little mystery, so we picked up the first books in the series to see how Jack and Annie discovered the tree house and got started on their adventures. We'll definitely be reading more of these as bedtime stories!!

These are great, as everyone knows. I'm excited my kids are old enough to enjoy them.

The SciFi Chick Muses says

The Magic Tree House was the first "chapter book" series we started reading to our children! They loved the series and have continued to read the books on their own. History and Legends come alive in easy to digest bites for kids 6-10! They also have many of these book as Audio books so long car trips are a less stressful when you are "discovering" ancient Rome or helping the citizens of Camelot!

Anne says

My mommy and I read Dinosaurs before Dawn which is the first book in the Magic Tree House series. It was about Annie and Jack visiting dinosaurs that lived a long time ago. I learned that some dinosaurs ate plants and some ate meat.

First chapter book I read to my 4yr old. I was surprised at how well it kept his attention. I thought he would only sit through a chapter or two and we ended up reading the whole book in one sitting. We cannot wait to read the next one!

Madelin says

I Like this book because It gives Good details about what is Happening . The book is Mainly about 2 Kids that find a Tree house full of book and they wish themselves to a dinosaur world and something wierd happens and they end up in the dinosaur world. They Feel Wierd because they dont know where do they need to head. They pass a hard time there because dinosaurs chase them everywhere. Until they find their way home and They try to keep this tree house as a secret.

Amanda says

Starting these up with my 5-year old. She loves them, but I'm not sure they are holding up to a second reading.

Catherine says

My first chapter books!

Staci says

It was pretty good, considering that my kids were excited even though there was not much of a story. It's a simple read with a short plot that introduces the names of a few dinosaurs and a few facts about them as well. It's meant to be that way it seems, as an introduction to different parts of history for young children. The writing was simple enough that Isaiah could read most of it himself. I will probably get more of these to read with the kids when we have something we're learning that's related to a specific book from the series. I'll see if Isaiah wants to read some on his own as well.

Katey Lee says

This series is a great way to ease emergent readers into listening to chapter books aloud. We started with these at the beginning of the year and I hope to come back to it when they're able to read it!
