brilliant plot that reminds you of 'a few good men'. A talented and independent minded army civil engineer pits against his traditional and disciplined boss over road construction at world's highest and most dangerous terrain.

Great buildup to the story that takes you straight into the lives of the soldiers and their comradery. I wish this book were longer because I really wanted to armchair-travel in Himalayas.

Fantastic book on such a topic. Civilian engineer's experience in Military, somewhat I felt like lakshya movie. Although book is much older than movie but still refreshing. Anyone wants to read experience with road construction,border posts, military and Himalayan terrain can read this. Mesmerizing for me.

Ashutosh Patil says

Ethical dilemma. Whether follow strict army rules or stick to work ethics and complete task accordingly. Though it may seem that it is a story of a civil engineer who joined Border Road Organization to build road in one of the most difficult terrain in the world. However this book is more than that. It is also about difficulties faced by people living as well as working in mountainous region be it physical or emotional. Very well articulated book
