Very technical. Good for class.

I appreciated the more approachable writing style in this book versus the other I read for this class. Still rather dense.

Provided me with a great deal of insight as to the role of the reading specialist and the many, many issues one may encounter in the field.

We use this for our Administration and Supervision course in the Reading Masters. It's a really comprehension resource. I am looking forward to giving Brenda some feedback before the next edition. Some of the key areas compressed into the final chapter need to have more attention earlier in the book and the model two year plan needs to be revised. The assessment of impact is done as task completion but not true evaluation.
