Spider-Man #5 see Miles Morales up against Black Cat! :D This produces a completely different dynamic than you would have seen with Peter Parker and it works brilliantly! :D Miles Morales is on a hard learning curve but pulls things off and things are set up with Black Cat that are bound to come home to roost in future plotlines! :D

Still really loving this. Can't believe I fell a few issues behind. It's sooooo good!

### Terence says

Miles has been taken captive by Hammerhead.

Thanks to an internet blogger obsessed with the darker skinned Spidey, Gangke knows too and is freaking out...especially when Miles' Mom calls looking for him.

While not much happened in Spider-Man #6 I still appreciated it. Quite a few questions arose that once again have me wondering if Marvel will ever explain how Miles, his friends, and family got grafted into the main Marvel Universe. I really like Miles even though part of me wishes he wasn't in high school. Miles is paying the price for the other Spider-Man's actions when Doc Ock controlled his body...*Yeah*. Bottomline Black Cat doesn't like Spider-people so she can't be happy with the Marvel Universe that is bursting at the seems with Spider-peeps now. Quite a few potential storylines have opened up after this issue and I'm excited to see what's next for Miles.

### Airy Paola says

Creo que nunca nos habían mostrado el alcance de los poderes de Miles Morales y lo diferente que estos son a los del Spider-man de Peter Parker (hasta sus enemigos notan la diferencia entre estos 2)

Puntos extra por la entrada de Jessica Jones, eso y el estilo de pelea de Miles se volvieron mis sorpresas favoritas de esta historia.

4.5/5 estrellas

## Ronald Price says

This series just gets better and better. So far there is so much drama and action that each page leaves me wanting more. In this issue, we have (Miles Morales) Spiderman held captive by ruthless mob-boss Hammerhead and the seductive supervillain, the Black Cat. It was very interesting to see Spiderman's first meeting with these well-known (Peter Parker) Spiderman characters. It's sad that it seems that by default Miles Morales has caught the attention of Peter Parker's long list of enemies just due to the mantle that he is now carrying in the Marvel Universe.

We also have the drama going on with Ganke, Morales' best friend who has exposed his secret identity to new classmate and also former X-Man, Goldballs. What is going to happen with this storyline? Also, what will Morales think when he finds out that Ganke has also volunteered Goldballs as a new roommate and is also sharing all his personal business to this new person?! It seems like the friendship between Morales is and Ganke is definitely being tested to its limits these days.

Also, Morales' family is distraught that he is still missing for such a long time. His grandmother thinks that he is on drugs and they are in the process of hiring a new private investigator to help with the case of finding out what is wrong with him.

All this is going on and at the same time the book is headed into the Marvel Civil War 2 event next issue. What will happen next? Curious minds would like to know. I look forward to reading the next book in this series.
