## **Suman Chinna says**

i wanna read because my frnds suggested to read about this.

**Vinay Kumar says**

Exceptional narration of a fictional story created around Terrorists (Talibans, Al-Qaeda etc.) mixing real incidents gripping the reader. This book also provides adequate explanation about origin of terrorist groups in Afghanistan and Pakistan and the people behind them. It will also educate the reader about the then social and political situations in corresponding Asian countries and USA. Overall an another excellent novel from Yendamuri. Thank you sir.

## Karthikeya Sharma says

I have enjoyed reading it at parts. I am shocked that Kamal Hassan's Vishwaroopam resembles this story. Not sure if the movie is officially based on this novel. Coming to the novel, I like the way Yandamoori tries to create situations based on some obscure scientific/historic facts, but at some moments, things become too superficial to not irritate me. Compared to his other novels, less number of characters are created, which I

appreciate. However, I feel they are not thoroughly established to get the threshold emotional connect. Atleast, this is the case with me. All these doesn't matter much as long as one enjoys a novel.
