## **The Wolf's Call. Two-Natured London 1.** Susanna Shore

“Are you trying to intimidate me, Mr Green?” she asked calmly, refusing to lean back.

“Yes, I am,” he answered. He pressed his hands on the armrests of her chair and leaned closer to her face, never breaking the eye contact. “Is it working?” Closing in the short distance, he kissed her.

Having been raised by humans-first parents, Charlotte Thornton is completely unprepared for a man like Raphael Green, a wolf-shifter. After a lifetime of controlling herself, the onslaught of emotions he causes in her, both lust and aggravation, seem like too much to handle. Unlike human men around her, Rafe is not weak. But neither is she, and Rafe is about to learn it. She finds herself drawn to him unlike any man before, only to learn that he won't date humans. But what if she weren't a human?

Rafe never thought he would pursue a human, let alone a woman as dominant as Charly, but his wolf side has other ideas. For a shifter, ignoring their beast's choice is practically impossible, but he will try; his brother's marriage is enough of a warning. But as he is drawn to her with a maddening lust, it becomes difficult to prevent his wolf from putting out its call for her. Then her life is threatened and everything changes.

From the high-end neighbourhood of London to peaceful countryside, their enemies hunt them. Time for making up their minds is running out.

### **MJ says**

Not terrible, and it's an interesting idea... but anytime it moves to point out a specific 'world' difference, it just comes across as clunky to me.

Shifters have ghostly animals popping out from their chests that snap and fight each other if they haven't sorted dominance.

The special power that the moon gives vamps and shifters is called 'Might'. Yep, Might... capital M. There's a whole human centric issue that's going on.

There's more, but that's probably enough.

---

### **Heather andrews says**

Holy Batman Rafe is such a damn tease, "stifling a satisfied smile, he shifted in his chair as if seeking a better position to sit in, offering her a better view. He didn't mind her looking at his chest." He's also bossy, but he does bossy so sexy, "don't ever go into a dark park alone again," he said sternly, remembering his earlier aggravation. "Do you hear me, woman?" I mean really sexy bossy, "woman, when I tell you to run to safety, you bloody well run to safety." He can be an a\*\* at times as well, "he sneered. "If you want to get into my bed, you're welcome, baby. But we both know it's only my body you want. You don't have to pretend to be interested in me simply so you can shock your parents." He's well endowed and has much stamina, "when she began to fumble them open, he let her, groaning in pleasure when his erection sprang free. She made a small, delighted sound, and wrapped her fingers around him tightly, making his brain short-circuit. "Baby, if you want me to finish this properly, you'll have to let go."

### **Michelle says**

If I were feeling extra generous, I'd give another half star. But I'm not sure I'm feeling generous.

This is a "please don't let me have paid for that" book. I won't be continuing the series.

### **Tammy Sowards-Sanchez says**

#### **Good**

This book was good. Warning the bigotry is high in this story and it upset me. Over all the story was good .

---

### **Kristy Mills says**

I liked this. I liked it because the human in it was really a wolf. She just didn't know it. I like that neither one of them had to settle. Rafe got his wolf mate and Charly got Rafe. :)

I loved how her wolf came out. When Rafe was threatened. I just wish that Rafe would have been conscious to witness it.

---

### **Jessica says**

I enjoyed this book. It was entertaining and the plot line was intriguing. At times it was a little predictable but I did find it interesting that the modern world new about the paranormal world. There was a few grammatical mistakes, but that could be because of the transfer to digital.

---

### **Rose says**

I would give this book a solid 3.5\*s. I am planning to read book 2 next. The editing wasn't bad. My biggest problem was when referencing the pet dog in the book (Bob) they referred to him as it. I now this is not a UK thing so it must be something specific to the author. Easy enough to (if not ignore) get used to.

---

### **Jessica says**

Rafe and Charly are wonderful! What a twist, I was really hoping for that! I look forward to reading more

---

### **Vicky Camp says**

#### **A unique paranormal world.**

I enjoyed the world Susan Shore has created, where shapeshifters , vampires , and sentients live openly with humans. The use of magic is part of the story but the main theme is of intolerance and the willingness to accept differences in those we love.

I would recommend this book to anyone who likes a good romance.

### **ZARIA (Sheldon Cooper lover) says**

---

**Jeannie says**

An amazing fast paced paranormal read. Step into a fantasy or maybe a possible future?

---

**Michelle says****Wolf's Call**

well written story of find out about yourself at the same time finding your mate. I enjoyed it very much.

---

**Delta says**

Really enjoyed this and will continue with series.

First reading September 2014

Second reading July 2016
