Children's Encyclopedia of American History is a valuable resource. Even if we weren't homeschooling, I would want to own this book to supplement learning American history. Primary source illustrations and brief text provide an engaging overview. Maps and photographs are typical of the format and publisher, but what I particularly liked are the primary source illustrations. Artwork, hand bills, line drawings (one by John Smith, one by Daniel Boone in early chapters), models of ships and photographs of traditional housing provide not only data, but a visual feel for a time period.

Although somewhat biased in places (there is a somewhat disproportionate mention of women and the environment as well as disproportionate praise of FDR), overall the text captures important people and events with brevity. Even though the occasional paragraph doesn't ring true, overall this is a solid work, and you will be hard pressed to find much better (unless a biased work completely in favor of your opinions is what you are seeking).

Appendices continue the pattern of excellence in presentation combined with commitment to primary sources. Presidents of the United States and Facts about the United States are followed by The Declaration of Independence and the Constitution, including the Bill of Rights.

Highly recommended for students of all ages seeking to understand the timeline of American history.

We studied this book for two years as part of our homeschool curriculum. Interesting, engaging, and well illustrated. I also found it to be fair and balanced. The vocabulary is complicated (without enough definitions) for children, and not as well done as other encyclopedias I've used.

Rebecca says

It is an encyclopedia, so it is hard to be excited about reading it. However, this one is laid out nicely with timelines and illustrations that make it fun to learn about American History.

We have only made it through the first half with our 3rd grade studies and will pick up the rest and update our review after next year's studies.

Danielle Friedrich says

So glad to have completed this as a family! I learned almost as much as the kids! Very thorough.
