Belinda says

I enjoyed reading about three friends and the depths of their friendship. Lisa, Almirah & Delyah. Two single and one married. Delyah, the married one got the worst end of the deal. Her husband Anthony contracted HIV from his lover, Andrew and of course, he infected his wife. Once she became symptomatic she thought she had the flu. Incidentally, they have a 3 year old. Married women don't always have the perfect life as her single friends thought she had. Good read.
